**BIKEPACKING RANGE**

Touring made simple! Our saddle bags, frame bags and bar bags are all made from the highest grade, military waterproof material, with each one adaptable to any frame, any rider, and any load.

**RACE RANGE**

Aimed at ultra distance riders, Restrap has pushed the boundaries of its design and manufacturing capabilities to produce the lightest complete race range yet, weighing less than 1kg in total.

**EVERYDAY RANGE**

Whether commuting or running errands, our range of panniers, backpacks, hip packs and more are designed for the rigours of day-to-day life as your constant companion. Waterproof, easy to clean and ready when you are.

**FOLDING BIKE RANGE**

Speed across the city with our range especially for folding bikes. The Restrap City range makes carrying any essential items easy and practical. Waterproof and handmade in the UK.

**ACCESSORIES**

Our Accessories range is packed with innovative solutions to your needs on the road. If something irks you while bikepacking, rest assured we’ve probably already thought of it and have a solution for you.

**TIMELINE**

- 2010

Restrap launches with it’s first product the Diagonal pedal strap, handmade in the UK. The name Restrap is born as a reference to the straps being made from recycled seatbelt, which continues today.
- 2012

Restrap moves from a back bedroom to it’s first workshop and launches it’s first backpack (the Highrise) and first messenger bag (the Loader).
- 2015

With a lot of time and development, Restrap launches the first iteration of the Bikepacking range, a rackless bag system for travelling further by bike. With another workshop move around the corner, the team continues to grow.
- 2018

Restrap moves into a new 6,500sqft workshop, expanding the range and capacity.
- 2020

Restrap launches the Race range aimed at ultra and endurance racers.
- 2021

The start of 2021 saw us move into our new factory on Kirkstall Road, Leeds with the addition of new tooling and machinery we continue to manufacture in-house and design and develop innovative luggage for the cycling industry.
- 2023

We expanded our product range even further with never-before seen additions to the bikepacking market: The Hike a Bike Harness, Quoc x Restrap Sandals and our Everyday Range.
- 2025

Sees us launching the first products of our Switch ecosystem leading to the launch of our first Rack earning a Design & Innovation Award before it even comes to market.

# BIKEPACKING

THE RACKLESS TOURING SYSTEM THAT ATTACHES TO ANY BIKE, WITHOUT MOUNTS OR SCREWS.

## TOURING MADE SIMPLE

Our Original Range of Bags for Rackless Touring with Simplicity and Durability at the Core. At Home on or Off Road, These Bags Allow You to Carry Everything, Everywhere, on Any Bike.

## BAGS THAT WORK FOR YOU

Designed as a Complete System, the Bikepacking Range Offers Unrivalled Versatility and Functionality Allowing You to Focus on Your Adventure.

## RUGGED & RELIABLE

Through Countless Tours, Weekenders, and Weeknight Camp-Outs, These Bags Have Proven Themselves Time and Time Again.

## MADE IN ENGLAND

All Our Bags Are Handmade in the UK, Which Means We Can Guarantee Their Quality. Our In-House Production Means We Have Full Control Over Our Entire Production Process, from Raw Materials to the Finished Product.

ROLLTOP CANISTER BAG

4 LITRES

Flexibility is king when cycling. Most of us are minimalists, maximalists, weight weenies, “just-in-case-ies”, day riders, overnigheters and long distance riders at different times during our riding lives and sometimes over the course of the same weekend.

That’s why we design all of our products to work as part of a larger system of luggage. Use them by themselves, or team them up when you need more capacity. Nothing summarises this design philosophy more than our Rolltop Canister Bag – master of all trades, jack of none...

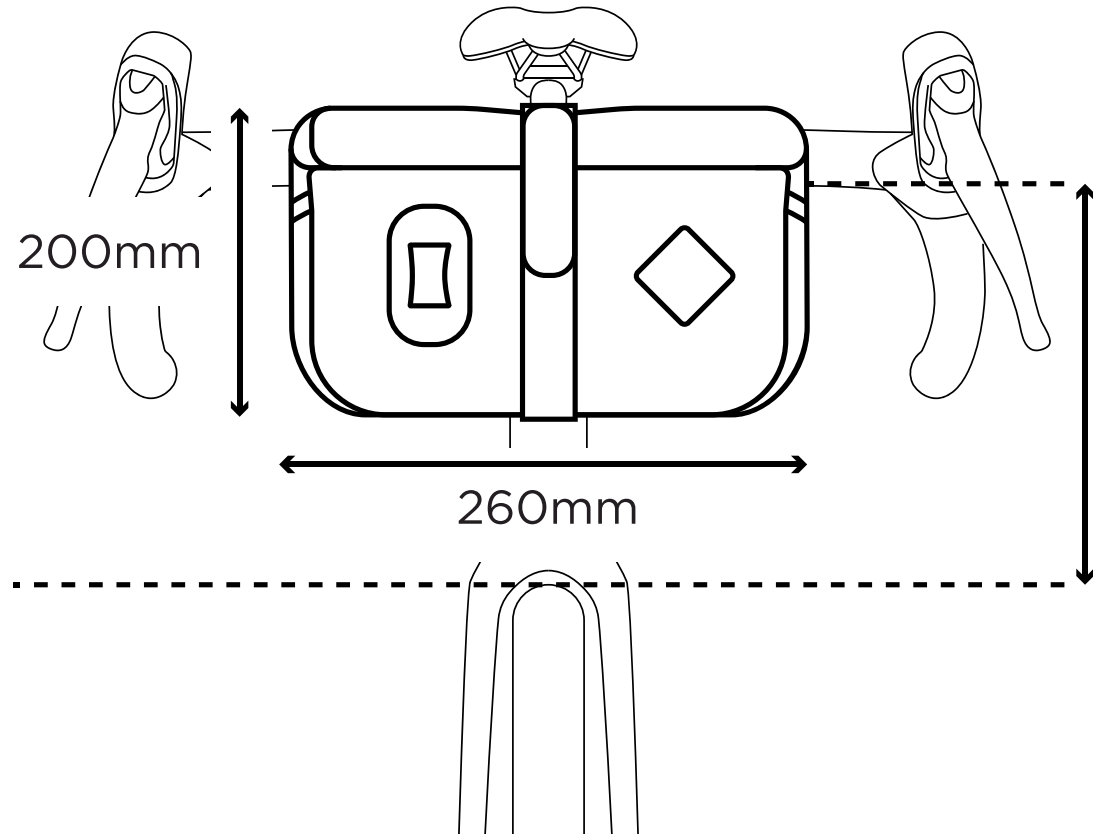

The Rolltop Canister Bag is a multifunctional item that is designed to fit directly onto your handlebars or mount onto the Holster Bar Bag via our 3P attachment system. When not on the bike, the Rolltop Canister Bag can be slung over the shoulder, making it the perfect accessory for storing your valuables or smash-and-grab garage forecourt snack raids. The 4l capacity makes it ideal for a selection of food, extra layers, point-and-shoot camera and wallet/passport.

The 100% waterproof Rolltop Canister Bag fits directly on to your bars via webbing fast straps and is secured around the headtube with a simple elastic toggle. A Fidlock buckle keeps the rolltop rolled and bag compressed, but is easy to open with a single hand. Stretchy mesh side pockets are perfect for stashing gels or snacks.

When using the Rolltop Canister Bag with the Holster Bar Bag, the webbing fast straps simply thread through specific D-rings on the front of the Holster. An extra velcro strap secures the Rolltop Canister Bag at the bottom and prevents any bounce.

Removing the Rolltop Canister Bag takes seconds, wherever you mount it. Whip it off when you get to a cafe stop and sling it over your shoulder using the included minimalist and adjustable paracord strap – simply clip the other end to the dedicated tab. Drop your GPS device in one of the sidepockets and feel confident that your valuables are with you and away from wandering hands.

ATTACHES TO HOLSTER BAR BAG

HOLSTER BAR BAG

14 LITRES

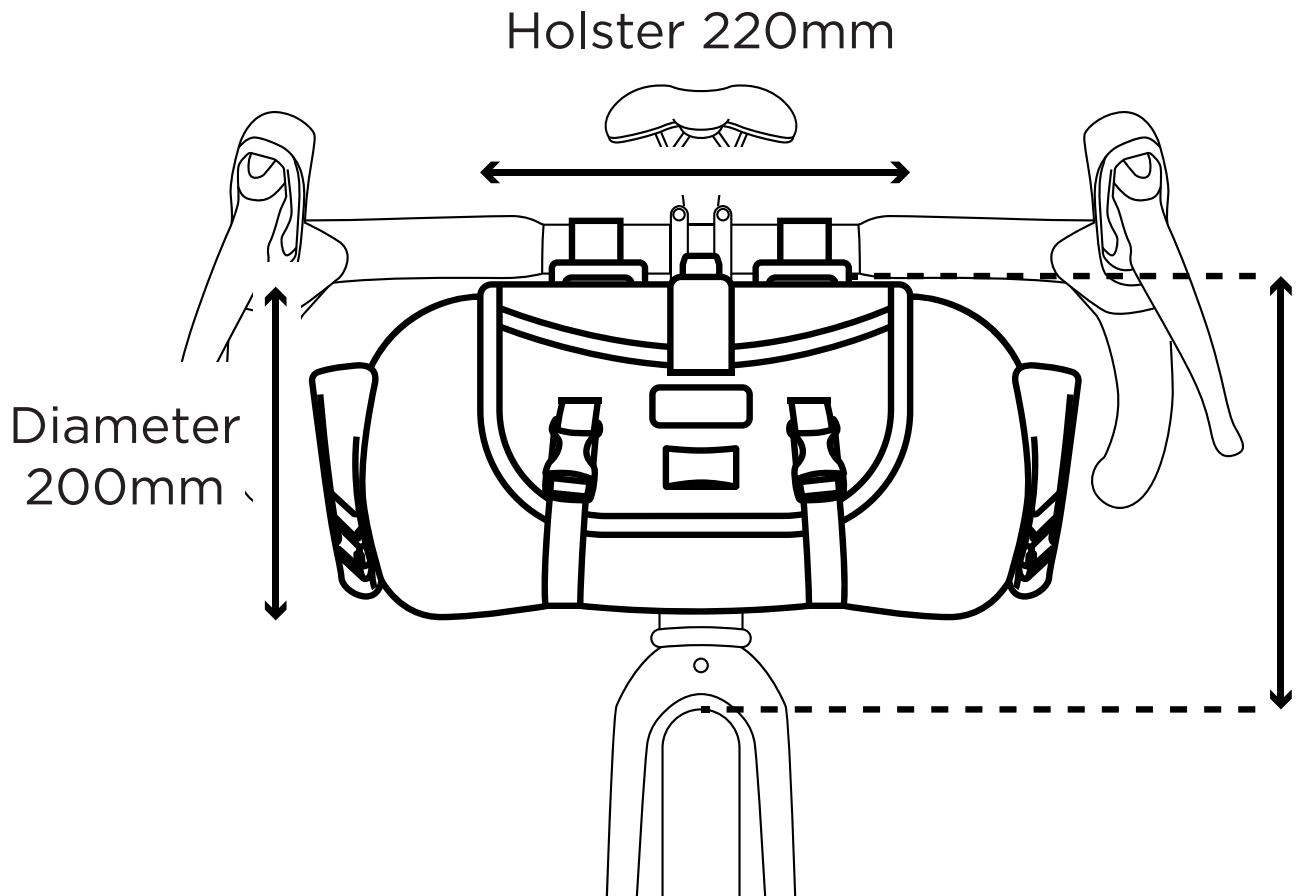

Over ten years of experience and product development has led us to the latest iteration of our design classic. The perfect blend of evolution and revolution; the holster bar bag is the same product that you know, except better in every way.

Why do we use a holster system? Because the most time consuming part of fitting and removing a bikepacking set up is strapping the bags to the bike. Our system allows you to leave the holster attached to the bike when you arrive at your destination and simply/quickly remove the dry bag in a couple of clicks. Reverse that process when you set off. Easy. Reliable. Slick. Less faffing and more riding.

We've got the right foundations, how do we make the rest of the product as good as it can possibly be?

- Easy-fit attachment points make fitting the holster securely a doddle. Cam-locks on the handle bars and webbing fast straps around the fork crown combine speedy fitting with bombproof stability
- Our unique GripTight patch secures the drybag to the holster. This has two benefits; firstly it makes placing the drybag in the holster an easier process, but most importantly it completely prevents the drybag slipping from side-to-side within the holster, no matter how rough the ride
- The drybag is manufactured from our most robust material ever. Designed to shrug off abrasions and perforations, it will keep the contents 100% waterproof, whatever the conditions. The double-ended design allows easy access to everything within.
- The elastic Stowage Strap is perfect for quickly stashing a pair of gloves or windproof jacket and keeping them immediately to hand for when conditions change
- Quickly clip a light to the built-in mount, for obstruction free placement
- The Holster Bar Bag has been designed in conjunction with our Roll Top Canister Bag. Quickly and easily mount the Roll Top Canister Bag to boost capacity and add accessible, waterproof storage.

BAR PACK

Ideal for shop runs, off road adventures or audaxes, the Bar Pack is the perfect all day companion. Two fully waterproof roll top compartments provide 10 litres of capacity with a hypalon closure, securing the front compartment and providing a mounting slot for a clip-on front light or additional strapping. A mini D-lock holster sits between the two compartments, with the front compartment closure doubling as a securing strap for a lock for any urban excursions.

Structural rigidity is provided by an internal stiffener, a compact pack is guaranteed at all times due to the side-release tension and buckle system. An additional hard shell back provides further rigidity and a MOLLE adjustable headtube retention system guarantees a secure fit to your bike.

Foam spacers and spring-loaded cam locks provide a stable and reliable attachment to your handlebars an elasticated drawcord provides perfect on-the go storage for gloves, jackets and other accessories.

SADDLE PACK

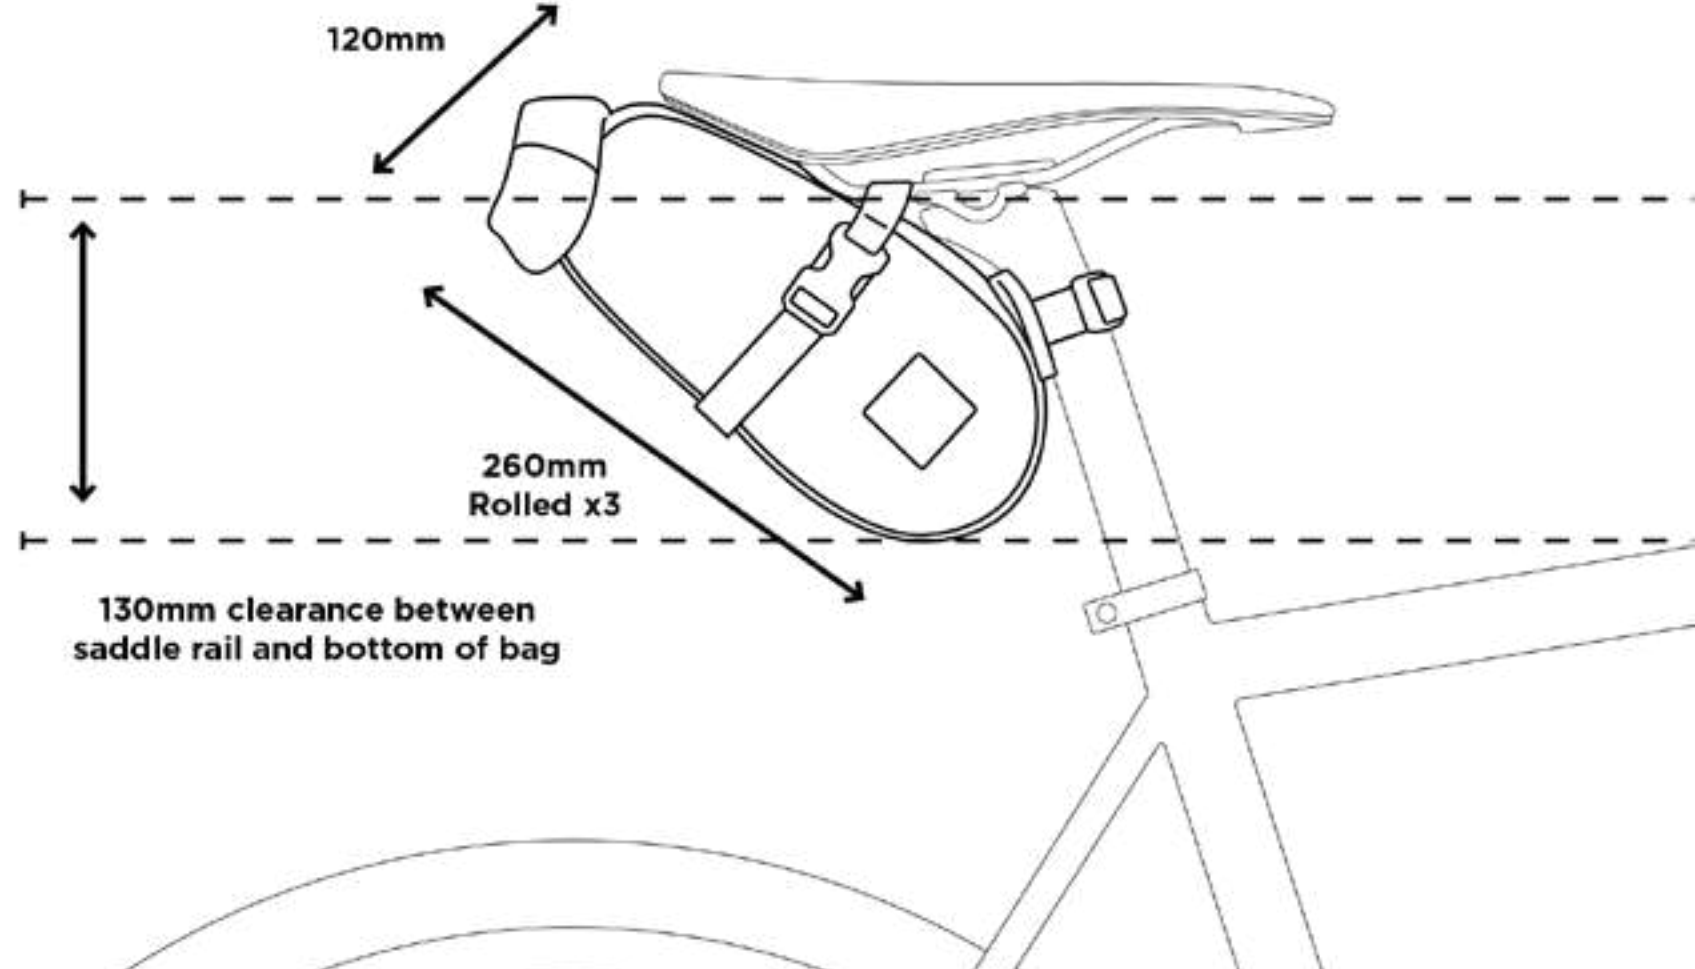

2.5 LITRES

Ride further, carry more. Our Saddle Pack is perfect for the rider who likes to journey just that little bit longer. We all know that increased distances require more contingencies, especially during inclement weather. Extra layers and spare gloves all take up room.

Redesigned for 2025, our Saddle Pack is designed to carry those long ride essentials more efficiently than ever. We applied years of experience to our original - best selling - Saddle Pack and redesigned it from the ground up.

A rigid internal structure keeps the bag stable, no matter how full or empty it is. Redesigned attachment straps mean that the bag sits snugly against the saddle and seatpost. There's no sway here.

TOOL POUCH

0.6 LITRES

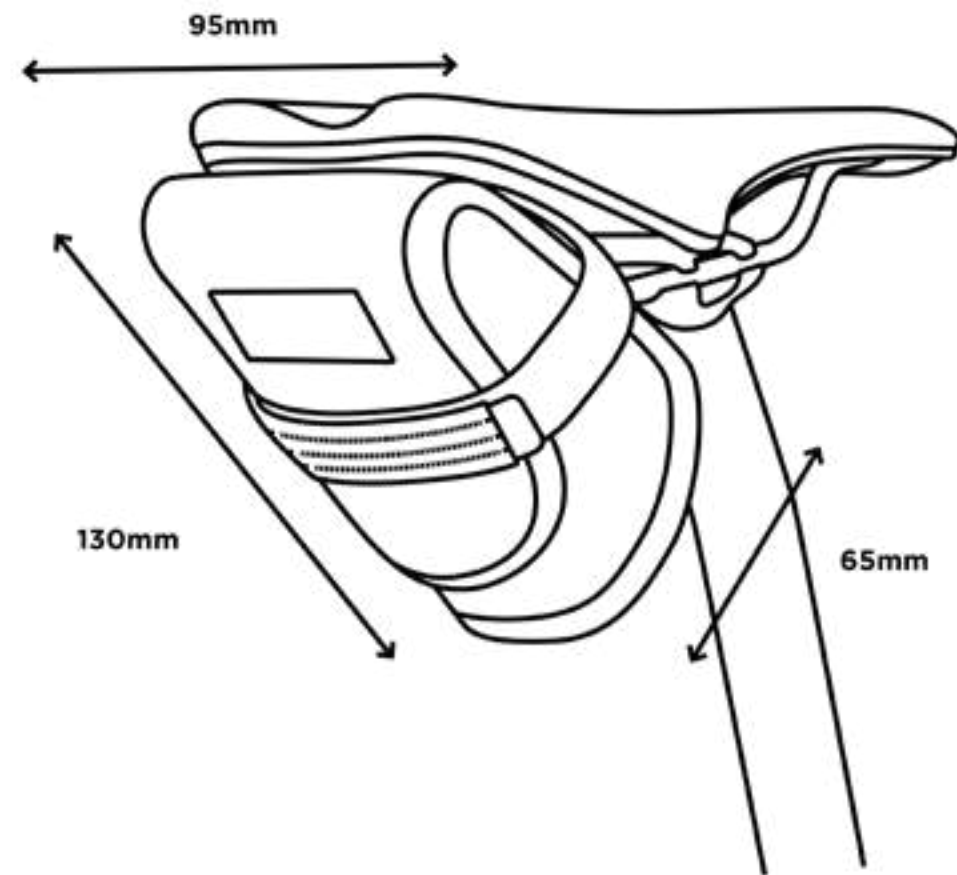

The Tool Pouch is ideal for carrying tubes, tools and spares during all kinds of riding, from road rides to mountain biking.

Made with hardwearing 1000D textured nylon and a nylon lining, this pouch is tough against grit and grime. The foam cushioning helps protect your tools and an internal storage sleeve is perfect for smaller items.

The adjustable velcro flap ensures that the pouch fits well, whether it's packed to the brim or lightly loaded and includes reflective detailing to aid visibility during night-time riding.

Finished with the classic Restrap label, made from vegan-friendly PU.

FRAME BAG

The #carryeverything frame bags allow you to easily increase the load you carry for comfortable bike packing and touring. With no mounts or screws, the bags come in three different sizes to suit any frame. With YKK zips, a fully waterproof 1000D cordura outer and VX21 fabrics, our Frame Bags are tough, durable and versatile.

Rubberised strapping provides extra grip to the frame and reflective paracord zip pulls give additional security. Inner mesh pockets keep you organised whilst on the road and the medium and large bags contain an additional document pocket. An extra cable slot is provided for dynamo cabling.

FULL FRAME BAG

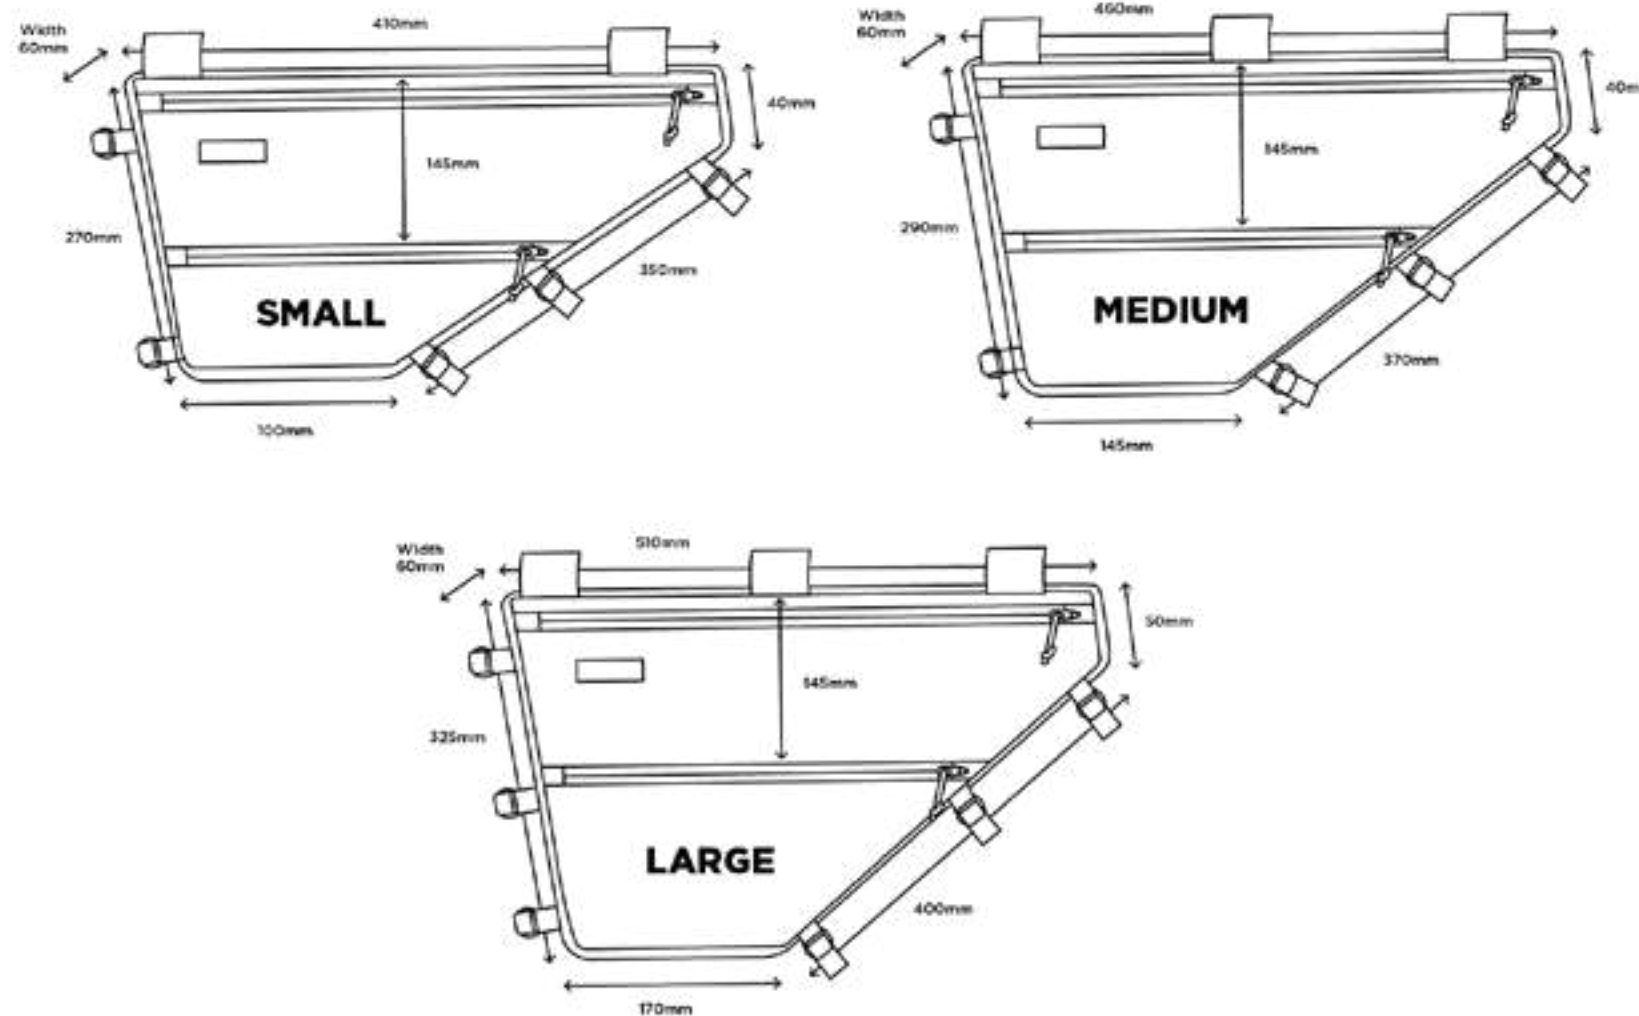

The Restrap Full Frame Bag allows you to easily increase the load out you carry for comfortable bikepacking and touring. The bags come in three sizes, designed to fit most standard frames and geometries.

Two Aquaguard YKK zips on the drive side of the bag allow easy access to the top and bottom sections of the bag, with internal velcro dividers to separate the compartments. These dividers aid the structure of the bag when fully packed, but also fold away to allow use of the full internal space of the bag if needed. The non-drive-side of the bag contains a document pocket, useful for storing smaller items.

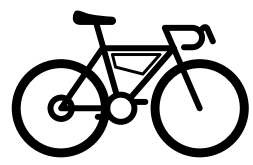

The bag is made from durable, textured nylon outer and VX21 fabrics, with a wipeable lower section that means the bag is easy to keep clean when riding off-road or in adverse weather. Rubberised strapping provides extra grip to the frame and webbing straps, with easy-to-use cam locking buckles, keep the bag sitting securely and free of movement while riding.

Hand made in our Yorkshire workshop, all bags are finished with the classic Restrap label, made from vegan-friendly PU.

TOP TUBE BAG

Whether you're out for an hour, commuting, or on a multi-day tour, the Restrap Top Tube Bag is perfectly designed to keep your tools and snacks within reach. Made from 100% waterproof 1000D cordura, and with a YKK zip, it will withstand whatever your ride throws at it. The headset fitting is designed to work with all headsets, including bikes with a low stack height.

The Standard version of the Top Tube Bag has a rubberised velcro strap for the top-tube, whilst the Bolt-on version contains a sturdy plastic base has reinforced holes to allow it to fix onto the top tube bolt bosses, eliminating the need for straps and keeping the bag secure. The headset fitting is designed to work with all headsets, including bikes with a low stack height.

TECHNICAL DETAILS

The diagrams illustrate the bag's dimensions and mounting options. The left diagram shows a side profile with dimensions: 180mm length, 130mm height, 30mm depth, 50mm width at the base, and 250mm width at the bottom. The right diagram shows the top view with dimensions: 180mm length, 130mm height, 30mm depth, 50mm width at the base, and 250mm width at the bottom. It also shows four hole options for mounting: 80mm, 24mm, 40mm, and 24mm.

# RACE

OUR LIGHTWEIGHT COLLECTION, DESIGNED AND MADE WITH ULTRA DISTANCE RACES AND AUDAXES IN MIND.

## RESILIENT TO THE ELEMENTS

Using YKK Aquaguard Zips and Tape Sealed Linings Where Possible, the Race Range Is Designed to Stand Up to the Elements, Allowing You to Ride in Confidence Through the Worst Weather. All Our Dry Bags Are 100% Waterproof, and All Our Bags Are Covered in a DWR Coating to Ensure Water Runs off the Bag, Not into It.

## LIGHT AS A FEATHER

Made Up from X-Pac® Fabrics, Which Are Derived from Sailcloth Technology, Our Adventure Race Range Is Durable, Resilient, and Lightweight. This Allows All the Products in This Range to Meet the Highest Standards Expected by Riders, On or Off Road.

## PRACTICALLY PERFECT

We Understand the Dedication and Commitment Ultras and Audaxes Require and Have Designed a Range of Bags to Match. Resistant to the Elements, Highly Reflective Detailing and Robust Technical Fabrics Mean That No Matter the Conditions and Challenges the Hours on the Bike Bring, You Know Your Bags Can Be Depended On.

RACE BAR BAG - FLAT BAR

7 LITRES

The Race Bar Bag - Flat Bar uses an updated holster system bar bag, taking all of our product development experience to create the most functional version yet.

Why do we use a holster system? Because the most time consuming part of fitting and removing a bikepacking set up is strapping the bags to the bike. Our system allows you to leave the holster attached to the bike when you arrive at your destination and simply/quickly remove the dry bag in a couple of clicks. Reverse that process when you set off. Easy. Reliable. Slick. Less faffing and more riding.

The Race Holster is married to a double roll dry bag, specifically optimised for flat bars. With 7L of functional, 100% waterproof carrying capacity, it allows for greater clearance (with a compact 160mm diameter) above the front wheel by running wider than our drop-bar version. With openings at either end, it allows you to easily access the entire contents without having to empty out the whole bag.

As with all of our holster system bar bags, the Race Bar Bag - Flat Bar uses our innovative GripTight patch for additional stability. A hook and loop system firmly secures the dry bag within the holster meaning: Placing a full drybag in the holster is an easier process  
The drybag is completely prevented from slipping from side-to-side within the holster, no matter how rough the ride

Attaching the Race Drop-Bar Bag to your bike is a quick and simple process:  
Strap the holster to the bars using the webbing straps and secure camlocks  
Stabilise the holster by wrapping the elasticated shock cord around your headtube and cinching up the toggle

The Race Holster is compatible with both the Race Double-Roll Dry Bag (included) and Race Roll-Top Dry Bag.

RACE BAR BAG - DROP BAR

7 LITRES

The Race Bar Bag - Drop Bar uses an updated holster system bar bag, taking all of our product development experience to create the most functional version yet.

Why do we use a holster system? Because the most time consuming part of fitting and removing a bikepacking set up is strapping the bags to the bike. Our system allows you to leave the holster attached to the bike when you arrive at your destination and simply/quickly remove the dry bag in a couple of clicks. Reverse that process when you set off. Easy. Reliable. Slick. Less faffing and more riding.

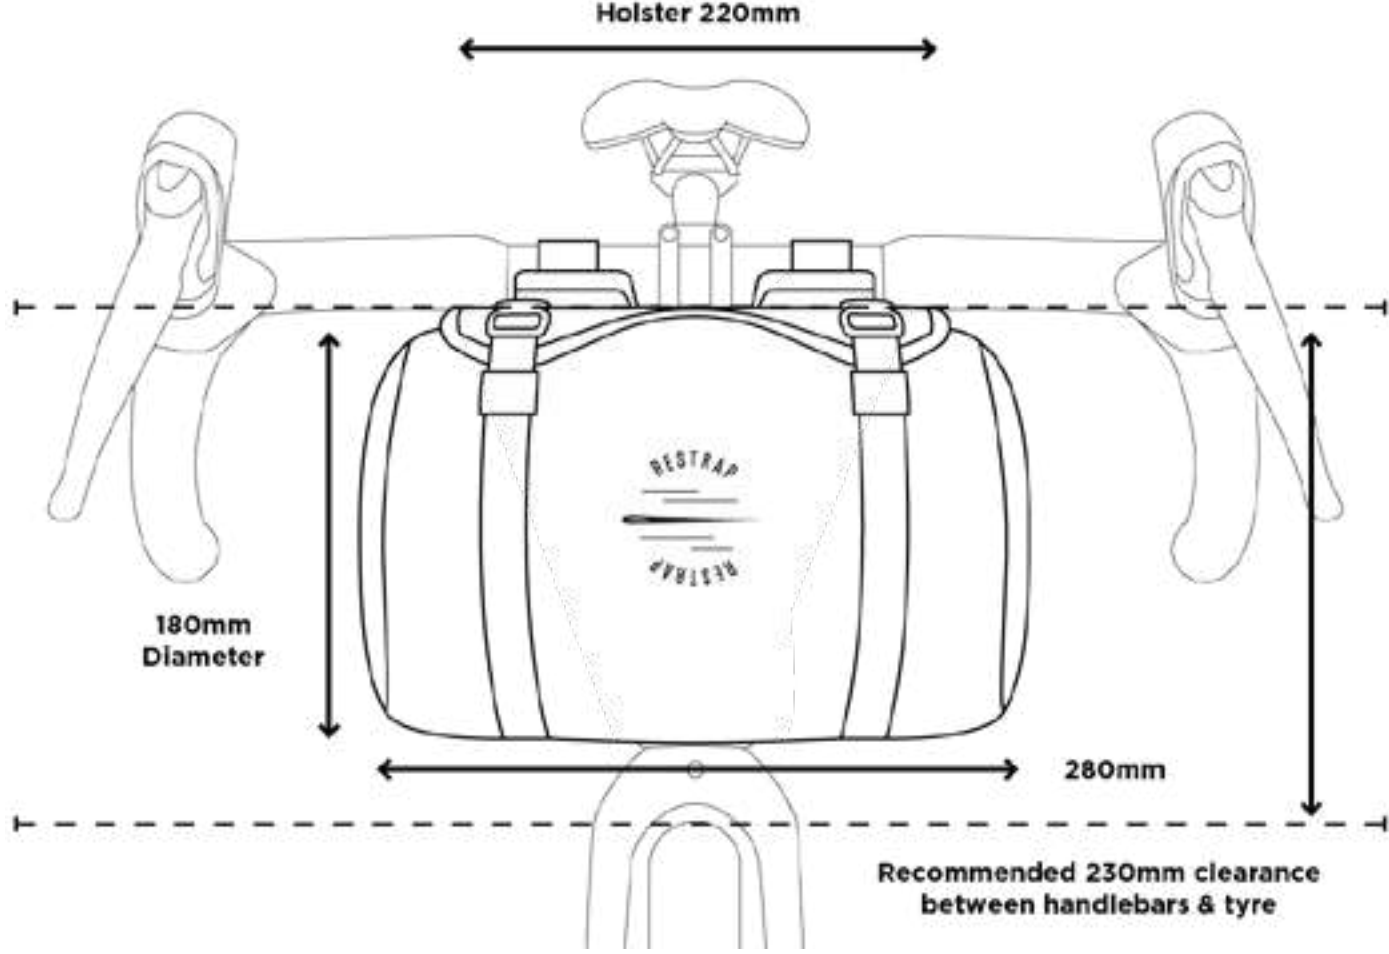

The Race Holster is married to a redesigned and updated Race Roll-Top dry bag. With 7L of functional, 100% waterproof carrying capacity and a width of 280mm, it is optimised to fit within drop handlebars. Stretchy, elasticated mesh side pockets are perfect for stashing snacks within hands reach.

As with all of our holster system bar bags, the Race Bar Bag - Drop-Bar uses our innovative GripTight patch for additional stability. A hook and loop system firmly secures the dry bag within the holster meaning: Placing a full drybag in the holster is an easier process The drybag is completely prevented from slipping from side-to-side within the holster, no matter how rough the ride

Attaching the Race Bar Bag - Drop-Bar to your bike is a quick and simple process: Strap the holster to the bars using the webbing straps and secure camlocks Stabilise the holster by wrapping the elasticated shock cord around your headtube and cinching up the toggle

The Race Holster is compatible with both the Race Roll-Top Dry Bag (included) and Race Double-Roll Dry Bag.

RACE AERO BAR BAG

7 LITRES

The Adventure Race Aero Bar bag uses our unique laser cut holster design for ultra-distance events, audaxes and races when using aero bars. The holster has a dedicated 7.0L drybag which is front-loaded and easy to take on and off the bike.

The dry bag is 100% waterproof and secured with a Fidlock™ magnetic buckle that's easy to adjust, even whilst wearing gloves. Reflective detailing on the dry bag also aids visibility during night time riding. The holster is a hardshell construction with an X21 technical outer. It also includes laser cut Hypalon loops to make it fully adjustable for different aero bars, whilst its elastic cord allows storage between the bars for smaller items.

RACE FRAME BAG - SMALL

The Adventure Race Frame Bag is a durable and lightweight bag, ideal for ultra-distance racing and audax riding. Built to be practical and functional, an X21 technical waterproof outer, waterproof 6oz nylon inner lining and YKK aquaguard zips keep inclement weather at bay, whilst reflective detailing boosts visibility and safety when riding through the night.

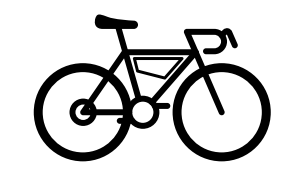

A Hypalon pocket cover helps to shield the zips from downpours whilst a cut out towards the front of the bag allows for device cable routing to the front of the bike. Pockets on each side and internal velcro divider in the main pocket keep your essentials organised and easy to reach. An extra hidden cable slot is also provided at the front of the bag for dynamo and other device cables.

RACE STEM BAG

1.1 LITRES

The Adventure Race Stem Bag offers a highly adjustable and accessible storage solution for nutrition, tech, clothing and more. Multiple Hypalon MOLLE mounts and double sided velcro loops deliver a huge array of mounting possibilities. Our innovative, single pull drawcord closure, allows for effortless one-handed access into the bag when on the move. One upward pull on the Hypalon tab or shock cord opens or closes the bag respectively, whilst the internal stiffener aids easy access and helps the durable and waterproof VX21 outer hold its shape. Stretch mesh pockets offer additional external storage and an extendable nylon interior provides the option to boost the internal capacity when resupplying for the next leg of your journey. Both the shock cord and our signature Race Range heat-pressed logo are reflective, assisting visibility in low-light conditions and at night.

TECHNICAL DETAILS

	
Materials	<b>Body:</b> X21 Waterproof Materials & Hypalon <b>Lining:</b> 210 Denier Nylon <b>Webbing:</b> Nylon <b>Pull-cord:</b> Reflective Paracord

RACE TOP TUBE BAG - SHORT

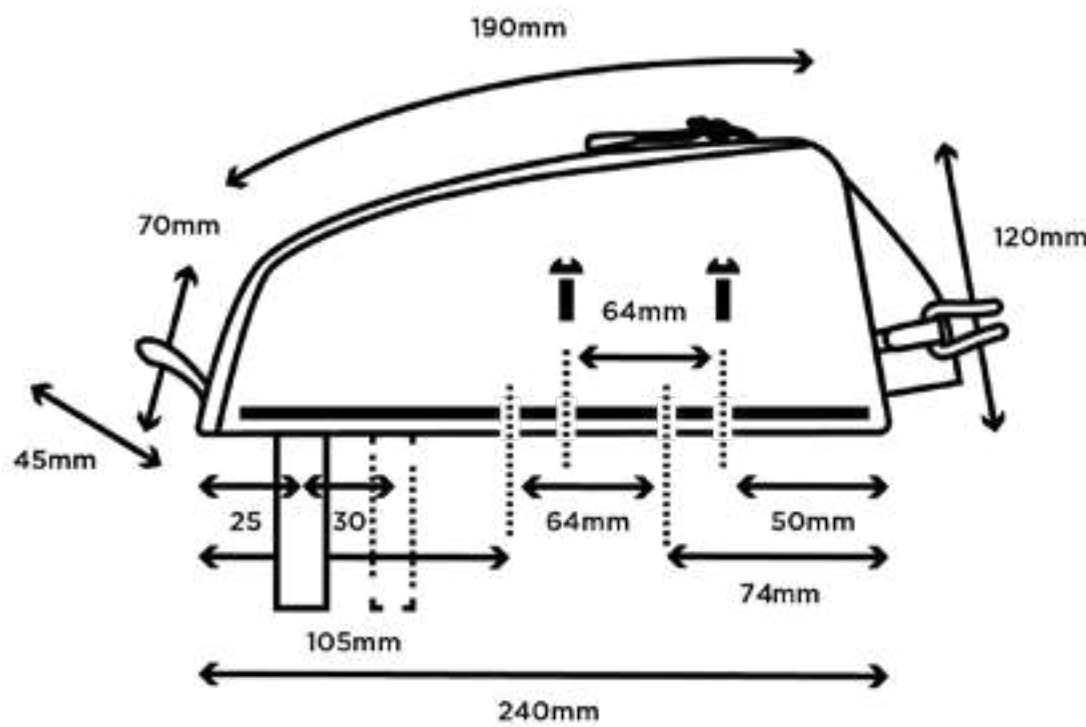

1.2 LITRES

Durable and lightweight, the Adventure Race Top Tube Bag is designed with ultra-distance racing and audaxing in mind. An X21 technical waterproof outer, waterproof 6oz nylon inner lining and YKK aquaguard zip keeps inclement weather at bay, whilst reflective detailing boosts visibility and safety when riding through the night.

Built to be practical and functional, the bag is held firmly in place with an adjustable MOLLE hypalon fitting combined with one of our Fast Straps, which allows the bag to function seamlessly with all Restrap Frame Bags. The rear strap can be removed to allow the bag to function as a Bolt-On Top Tube Bag if preferred.

A rigid internal plastic structure keeps the bag upright and stable and the universal headset fitting accommodates all headsets, including bikes with a low stack height. A stretch mesh side pocket provides storage for nutrition, wrappers and other on-the-fly essentials. The internal compartment has a foam base to add structure and prevent rattle while on the move.

TECHNICAL DETAILS

RACE HYDRATION VEST

7.5 LITRES

Made with a focus on functionality, the Race Hydration Vest is designed specifically around fuelling on the bike. The high placement on the back ensures maximum comfort in the riding position and compatibility with jersey pockets, allowing for easy access to essentials while on the move. It has been developed to adopt a genuine unisex design, ensuring comfort for individuals across all genders and body types.

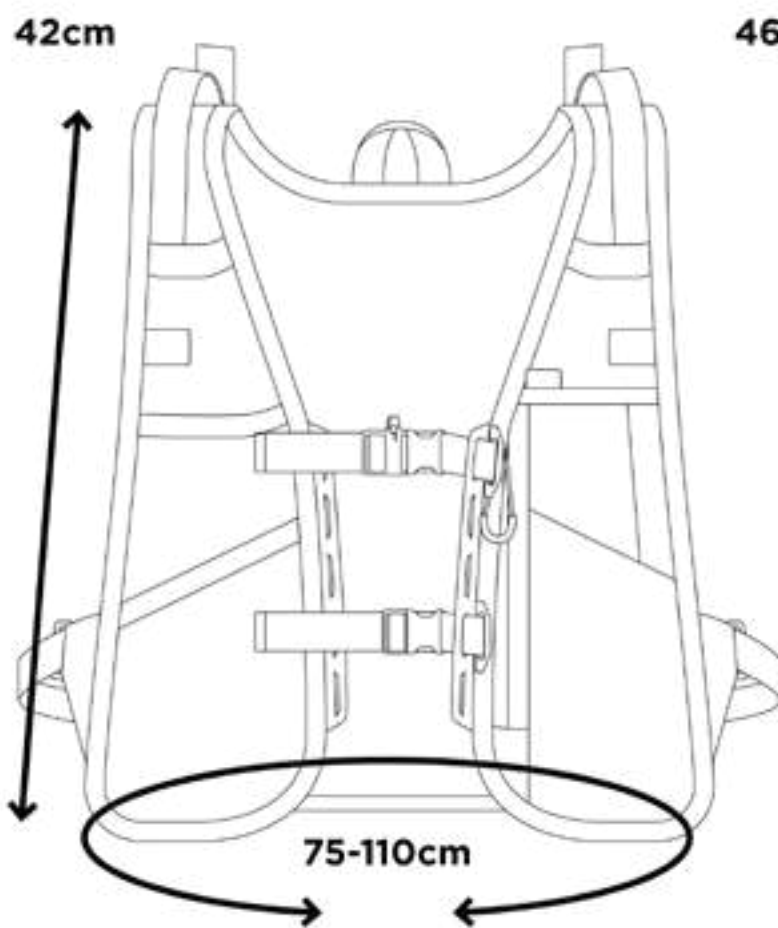

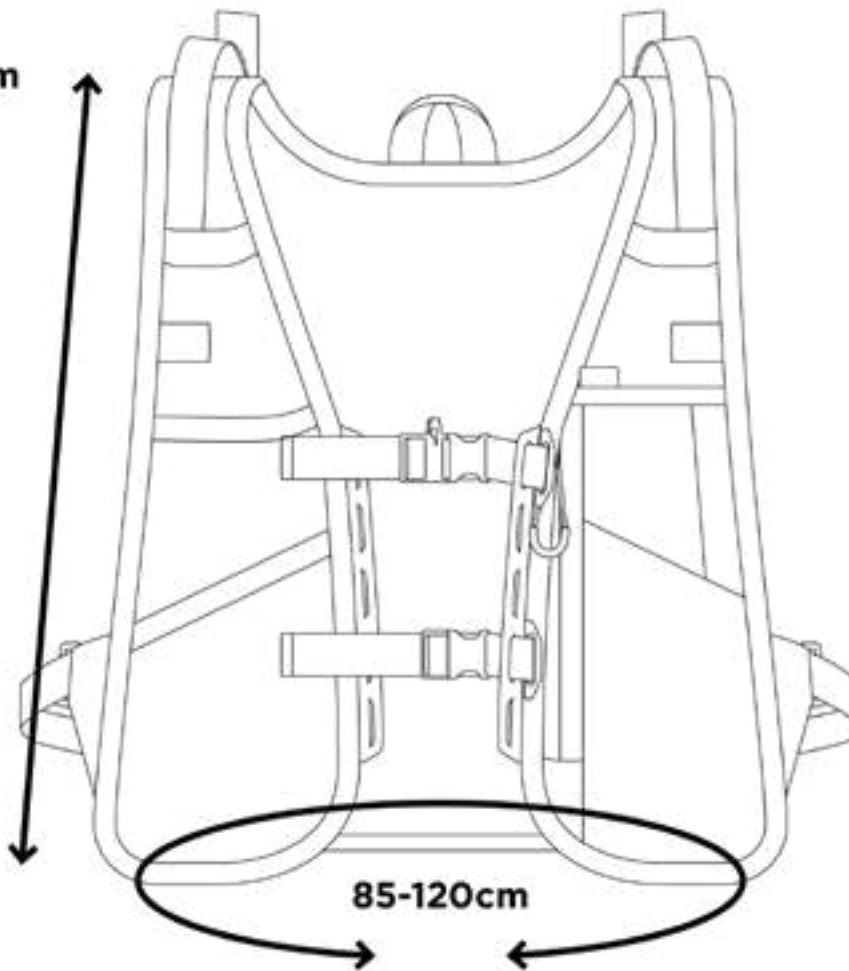

The Race Hydration Vest prioritizes comfort with three points of adjustment – sides, shoulders, and chest. The chest retention system offers five points of adjustment, featuring stretch webbing, an integrated whistle for safety, and an easy on and off clip system that is glove-friendly.

Equipped with a 2L bladder, the pack features an expandable internal lining for superior bladder fitment, eliminating any discomfort during extended rides. The back of the pack has two stretch mesh drop pockets that will easily hold two extra bottles and webbing loops that can be used for carabiner attachment for other items, such as race trackers.

The front of the pack features easy-to-reach stretch mesh pockets ideal for carrying a water bottle and snacks. Also featured is an expandable zip pocket with a key clip inside, for quick access to valuables. The ambidextrous bladder routing system and adjustable magnetic keeper clip allows users to choose exactly where they want to route the drinking tube and store it when not in use.

The inclusion of reflective zip pulls, logos, and webbing detailing enhances visibility from all angles, aiding safety during low-light conditions. A light loop also allows attachment of a clip-on light.

# FOLDING BIKES

THE RESTRAP CITY RANGE OFFERS VERSATILE CARRYING SOLUTIONS FOR FOLDING BIKES.

## BUILT LIKE THE REST.

The Folding Bike Range is manufactured to be just as durable and hard-wearing as all of our bikepacking and touring bags.

## MORE SPACE, MORE FUNCTIONALITY.

Crafted with simplicity and functionality in mind. Fold, roll, and carry your bike with ease whilst benefiting from versatile storage capacity designed to work with your bike.

CITY LOADER

Two fully waterproof, fold-closure, compartments offer up to 20 litres of internal storage. The main compartment is secured by an adjustable fastening strap with a Fidlock™ buckle, which offers additional external storage for the likes of a jacket or dry bag.

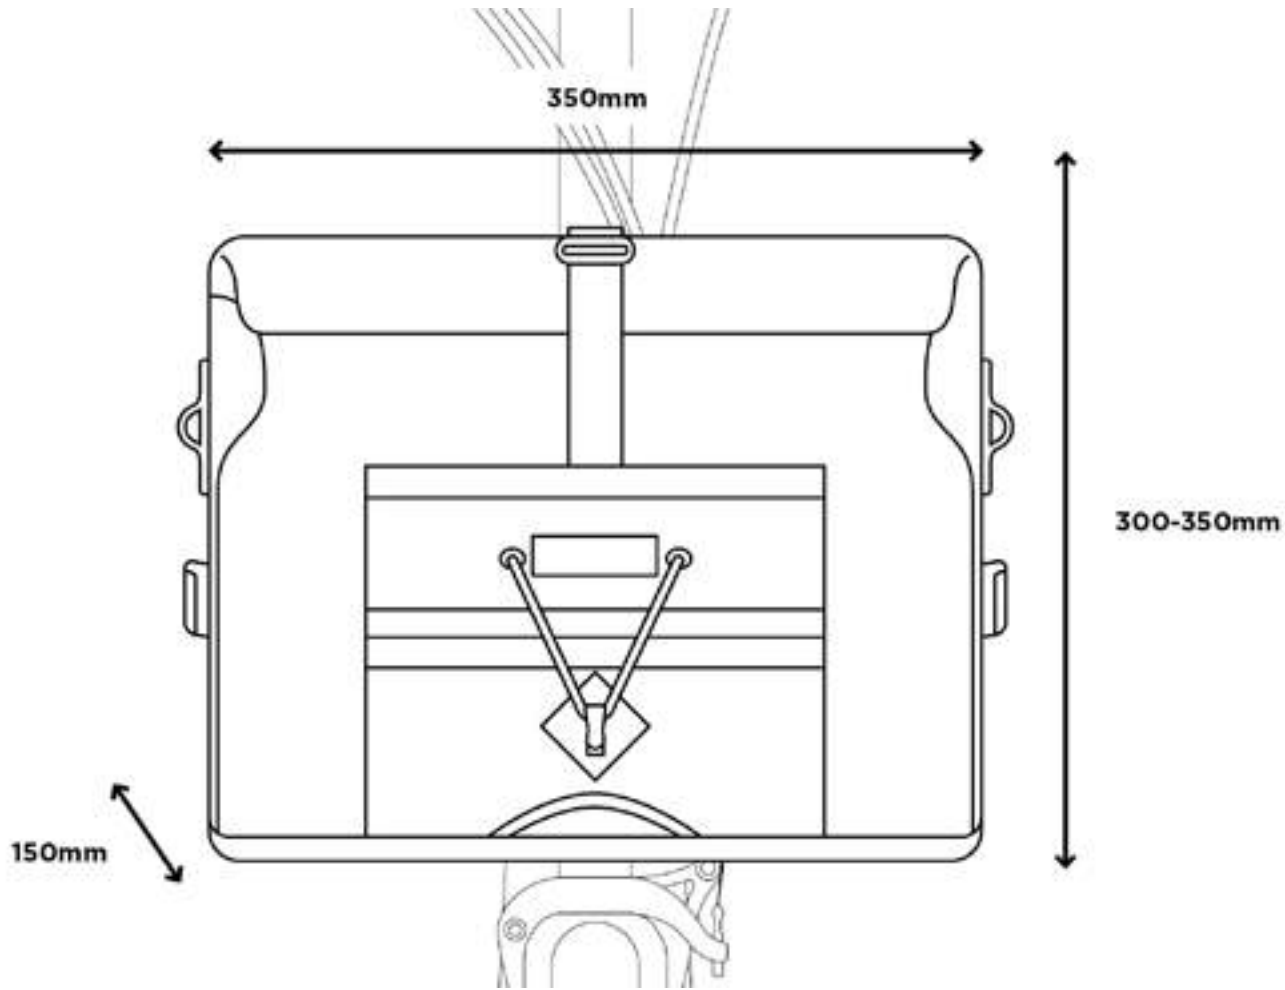

Compression straps on the sides of the bag act to keep the bag compact for smaller loads, whilst also securing accessories like bottles or locks stored in the side pockets. Reflective detailing, incorporated onto the front pocket, ensures good visibility for night time commutes.

A removable shoulder strap and carry handle, at the rear of the bag, make the City Loader comfortable and convenient when off the bike.

The bag is mounted via a Brompton front carrier block compatible fitting, both external and internal stiffeners enable the bag to hold its shape even when fully loaded. Made of 100% waterproof textured nylon, spare clothes and tech are guaranteed to stay dry on the wettest of commutes. The bag is also compatible with a Brompton front light, dyno light and front reflector.

Like all our City Range bags, the City Loader does not impact the folding mechanism of the bike.

TECHNICAL DETAILS

# EVERYDAY

WHETHER COMMUTING OR RUNNING ERRANDS, OUR RANGE OF PANNIERS, BACKPACKS, HIP PACKS AND MORE ARE DESIGNED FOR THE RIGOURS OF DAY-TO-DAY LIFE AS YOUR CONSTANT COMPANION. WATERPROOF, EASY TO CLEAN AND READY WHEN YOU ARE.

## CARRY THE ESSENTIALS

From tools to spare layers, pack the basics with bags designed for the job. Flexible, quick and easy to swap between bikes and built with the same attention to detail as the rest of our range.

ROLLTOP HYDRATION VEST

Introducing the ultimate backpack for use both on and off the bike. Made from hard wearing TPU outer material and featuring an orange nylon lining and airmesh back and straps, this backpack is both durable and comfortable to wear.

The bag features adjustable side retention strapping, with reflective front and rear straps for added safety and two side pockets for storing smaller items. Its specially designed zip compartment, for a 15" laptop, contains a safety retention loop to protect against theft and is also accessible from the inside. A second zip compartment includes a mesh pocket that can be accessed from both inside and outside, for quick and easy access.

Fidlock magnetic buckles and MOLLE system allow a comfy fit whatever you're wearing. The cushioned straps and chest retention come with added D rings for mounting accessories. Hypalon detailing adds an extra layer of durability, whilst easy roll-up velcro ends keep your bag neat and tidy. Also included is a removable waist strap and internal key clip.

The adjustable strapping system allows the backpack to expand up to 40L, making it perfect for carrying your essentials – and more.

Finished with our classic vegan friendly PU Restrap label.

UTILITY HIP PACK

6 LITRES

Introducing the Utility Hip Pack, a meticulously designed piece of kit, tailored to enhance your bikepacking expeditions, mixing on-body carrying capacity and on-bike functionality.

With an ergonomic fitting that accommodates a wide range of body types, the Utility Hip Pack ensures a comfortable and secure fit during long rides. Its adjustable retention system allows for a personalised fit, keeping the bag snugly positioned against your lower back, minimising movement and maximising stability.

Versatility is at the core of the Utility Hip Pack’s design. The bag’s waist straps ingeniously fold into the back panel, seamlessly transforming it into a practical bar bag with a fast strap retention system, letting you switch between hip and bar configurations on-the-go. Also included is a headtube retention system.

The Utility Hip Pack boasts a roll top closure featuring a fully waterproof and tape-sealed internal compartment, shielding your belongings from the harshest weather conditions. The addition of an easy Fidlock magnetic closure ensures quick and hassle-free access while maintaining a secure seal.

Also included is reflective detailing to enhance visibility during low-light conditions, and stretch mesh side pockets which offer quick and effortless access to smaller essentials. Whether you need to reach for energy bars or store a water bottle, these pockets provide easy organization and accessibility.

SWITCH PANNIER - 5L

Designed for adventure, convenient for the commute, our Restrap Switch Pannier is the perfect partner for those who like to carry more, or simply prefer a pannier system to bikepacking bags. They are also ideal for smaller bikes with less clearance for saddle and bar bags. Simply attach to your fork bosses or any compatible rack.

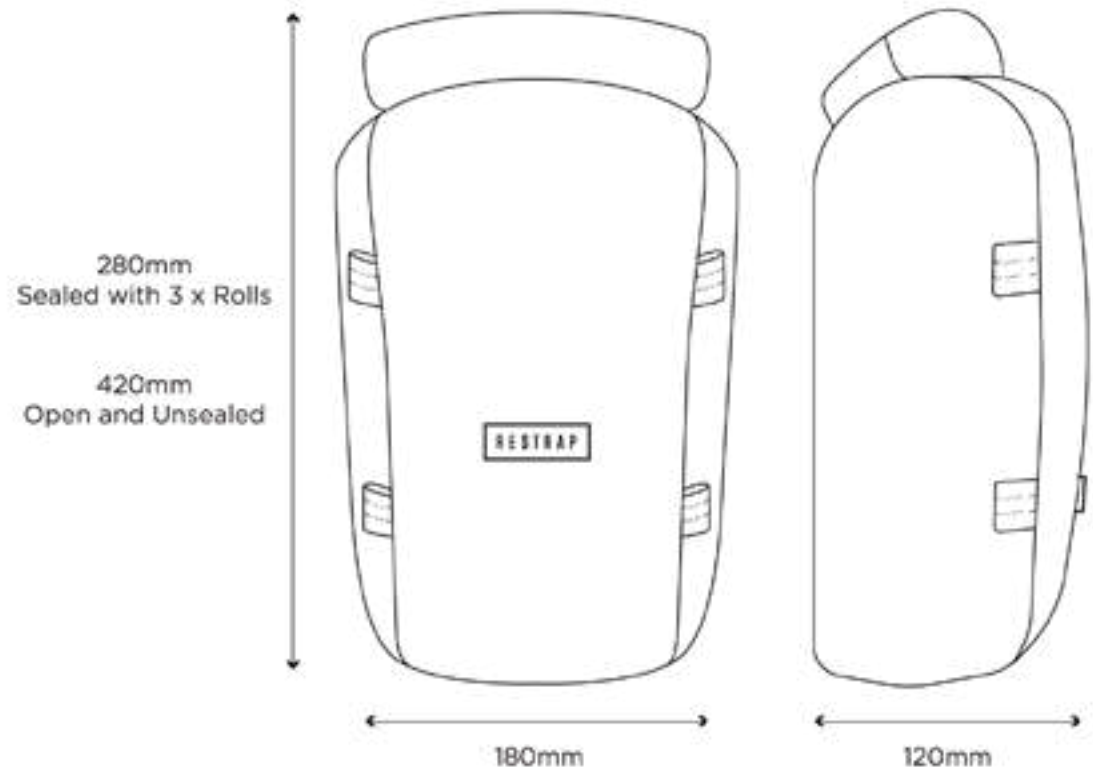

The Restrap Switch Pannier combines durable, waterproof external fabrics to create an extremely hardwearing, easy to clean outer. Paired with a fully seam-sealed inner, you can be confident that the contents will stay dry; whether it's your sleeping bag or work shirt.

Click and go

The Restrap Switch Pannier uses an injection moulded clip that drops directly into the Hiplok x Restrap Switch mount and a flexible back plate that provides structure to the pannier, while also dampening vibration and minimising rattles over rough ground.

The Hiplok x Restrap Switch system is a quick, simple and secure, modular fitment that can be used anywhere that has bottle bosses. It is ideal for many modern gravel forks and compatible rear racks. The Hiplok x Restrap Switch system not only allows you to place and remove your panniers in a matter of seconds, it also allows you to switch between panniers and the Hiplok Switch Lock. You can also quickly switch between cargo and bottle cages with the Switch Multimount. Flip between load lugging, quick commuting and extra hydration from one day to the next.

SWITCH MULTI MOUNT

The Hiplok x Restrap Switch system is a quick, simple and secure, modular fitment that can be used anywhere that has bottle bosses. It is ideal for many modern gravel forks and compatible rear racks as well as the usual frame bottle mounts. The Switch Multi Mount system allows you to quickly switch between carry and bottle cages, any other accessory with 64mm bolt spacing as well as all products in the Hiplok x Restrap Switch system line up.

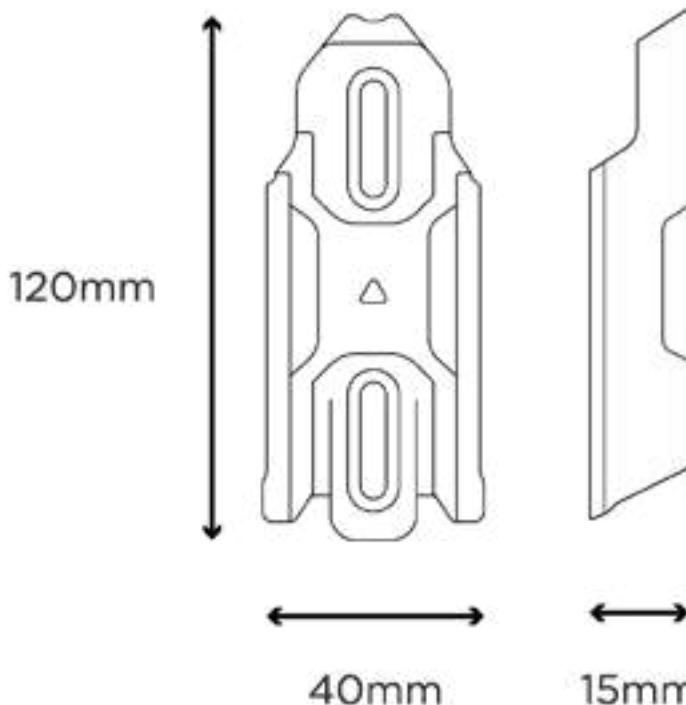

Take a modular approach to your ride and swap between touring with our Switch Pannier, to speedy commuting by dropping in a Hiplok Switch lock or a bottle cage with the Switch Multi Mount.

Fitting

- The Switch Multi Mount can be fitted to any bottle bosses.
- Please use the bolts provided. We recommend tightening the bolts to 5Nm, but check your bike's specification.
- We recommend not exceeding 3kg weight including the mount. This is because most bottle boss mounts are only rated to 1.5kg per bolt.
- Attach your chosen accessory to the Switch Clip
- Simply slide the Switch Clip into the Multi Mount
- To remove the accessory, press the base of the Switch clip towards the accessory and gently lift upwards.

- **HIPOK X RESTRAP SWITCH MODULAR FITTING SYSTEM**
- **MAX LOAD 1.5KG PER BOSS (CHECK FORK MANUFACTURER)**

PANNIERS

Our sleek roll-top panniers are designed for strength, stability and endurance. Available in 13 litres and 22 litres for both rear and front racks, they're fitted with magnetic buckles and contain a fully adjustable Rixon Kaul hook system for easy mounting to most racks.

Available in black and olive, the bags contain reflective detailing for improved visibility, whilst their 100% waterproof materials ensure contents remain dry and secure. Both sizes are capable of running clip-in accessories, laptop and tablet sleeve.

TECHNICAL DETAILS

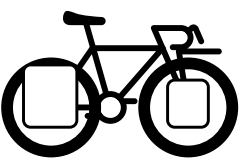

Technical diagrams of the panniers showing dimensions and mounting details.

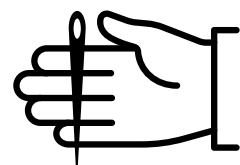

- 13L Pannier:** 300mm width, 250mm base width, 350mm height (rolled x3), Max 160mm Depth.
- 22L Pannier:** 400mm width, 250mm base width, 430mm height (rolled x3), Max 200mm Depth.

**LUGGAGE STRAPS**

Our range of luggage straps that allow you to carry extra items with ease. Our straps are designed with functionality first, and durability second and offer you countless ways to load out your bike the way you want to.

**PEDAL STRAPS**

The first ever Restrap product is still going strong, and since the very beginning we've made them the same way they always have been - by hand and in the UK, using reclaimed materials.

RACK STRAPS

Restrap Rack Straps are a strong, secure and versatile way to attach luggage to your bike-rack. Say goodbye to flimsy bungee cords – our straps are made from thick elastic webbing that’s specially manufactured for us in the UK. Simply attach the straps to your rack with our super-strong rubber o-rings and magnetic buckle. With a break strength of 50kg and a ladderlock system for length adjustment, our luggage straps guarantee flexibility for larger or more awkwardly shaped items whilst being exceptionally secure.

Length - 55 to 75cm  
Comes in pairs of two.

# RACKS & MOUNTS

MOUNTING HARDWARE FOR BIKEPACKING

## CAGES & MOUNTS

Our range of mounting hardware, designed to be robust and make your bikepacking adventures easier and more enjoyable.

## SWITCH ECOSYSTEM

Our Switch Rack & Switch Rack Cage are the perfect mounting solutions for bikes with smaller geometries or reliance on carrying more than a saddle-bag would allow.

SWITCH RACK

We have applied all the principles of engineered minimalism that are the hallmarks of Restrap’s luggage range to our Switch Rack: lightweight construction, durable materials, quick and simple fitment/removal.

The heart of Restrap’s Switch system; the Switch Rack is compatible with the Restrap Switch Panniers and all other Switch Multimount products as well as any product or accessory that uses 64mm-spaced mounting points, like bottle cages etc.

All mounting hardware included.

Compatibility:

Only compatible with bikes with a 12mm diameter thru-axle  
Compatible with bikes with 142mm or 148mm (Boost) spacing  
Not designed for use with full-suspension frames  
IMPORTANT – ensure axle thread pitch matches your bike. Do not attempt to fit without the correct thread pitch.  
UDH – bikes with a UDH derailleur will require a Restrap Switch UDH adapter (available separately)

Spares:

High Grade 7075-T6 aluminium axles in 1mm, 1.5mm and 1.75mm thread pitch are available separately.  
UDH Adaptor and Full Mount Adaptors available separately.

- **LIGHTWEIGHT ALUMINIUM ALLOY CONSTRUCTION**
- **MULTIPLE 64MM-SPACED MOUNTING POINTS**
- **MADE IN UK**
- **COMPATIBLE WITH RESTRAP SWITCH PRODUCTS**
- **25MM VELCRO STRAP TO FIT ALL SEAT POST SIZES AND SHAPES**
- **QUICK FLIP SYSTEM PROVIDES MAXIMUM WHEEL CLEARANCE ACROSS ALL BIKE SIZES**
- **HIGH GRADE 7075-T6 ALUMINIUM AXLES IN 1MM, 1.5MM AND 1.75MM THREAD PITCH OPTIONS**

SWITCH RACK CAGE

The most versatile luggage solution for your Switch Rack. Carry what you like, as you like. The Switch Rack Cage allows you to strap a dry bag – or anything else you wish – to its strong, light platform. You can even crack open a drink when you reach your location thanks to its built in bottle opener.

- 3MM THICK 5052 ALUMINIUM
- HIGH DURABILITY POWDER COATING IN A MATTE BLACK FINISH
- SILICONE MOLDED FEET
- THREE STRAP SLOTS PER SIDE
- BUILT IN BOTTLE OPENER

Compatibility:

Only designed for use with the Restrap Switch Rack.  
Not intended for vertical use.  
MAXIMUM RECOMMENDED LOAD: 5KG

TECHNICAL DETAILS

Size	H294 x W124 x D34mm
Weight	240g
Product Codes	RS_SWI_SRC_BLK
HS Code	8714999000

BUMPER BAR

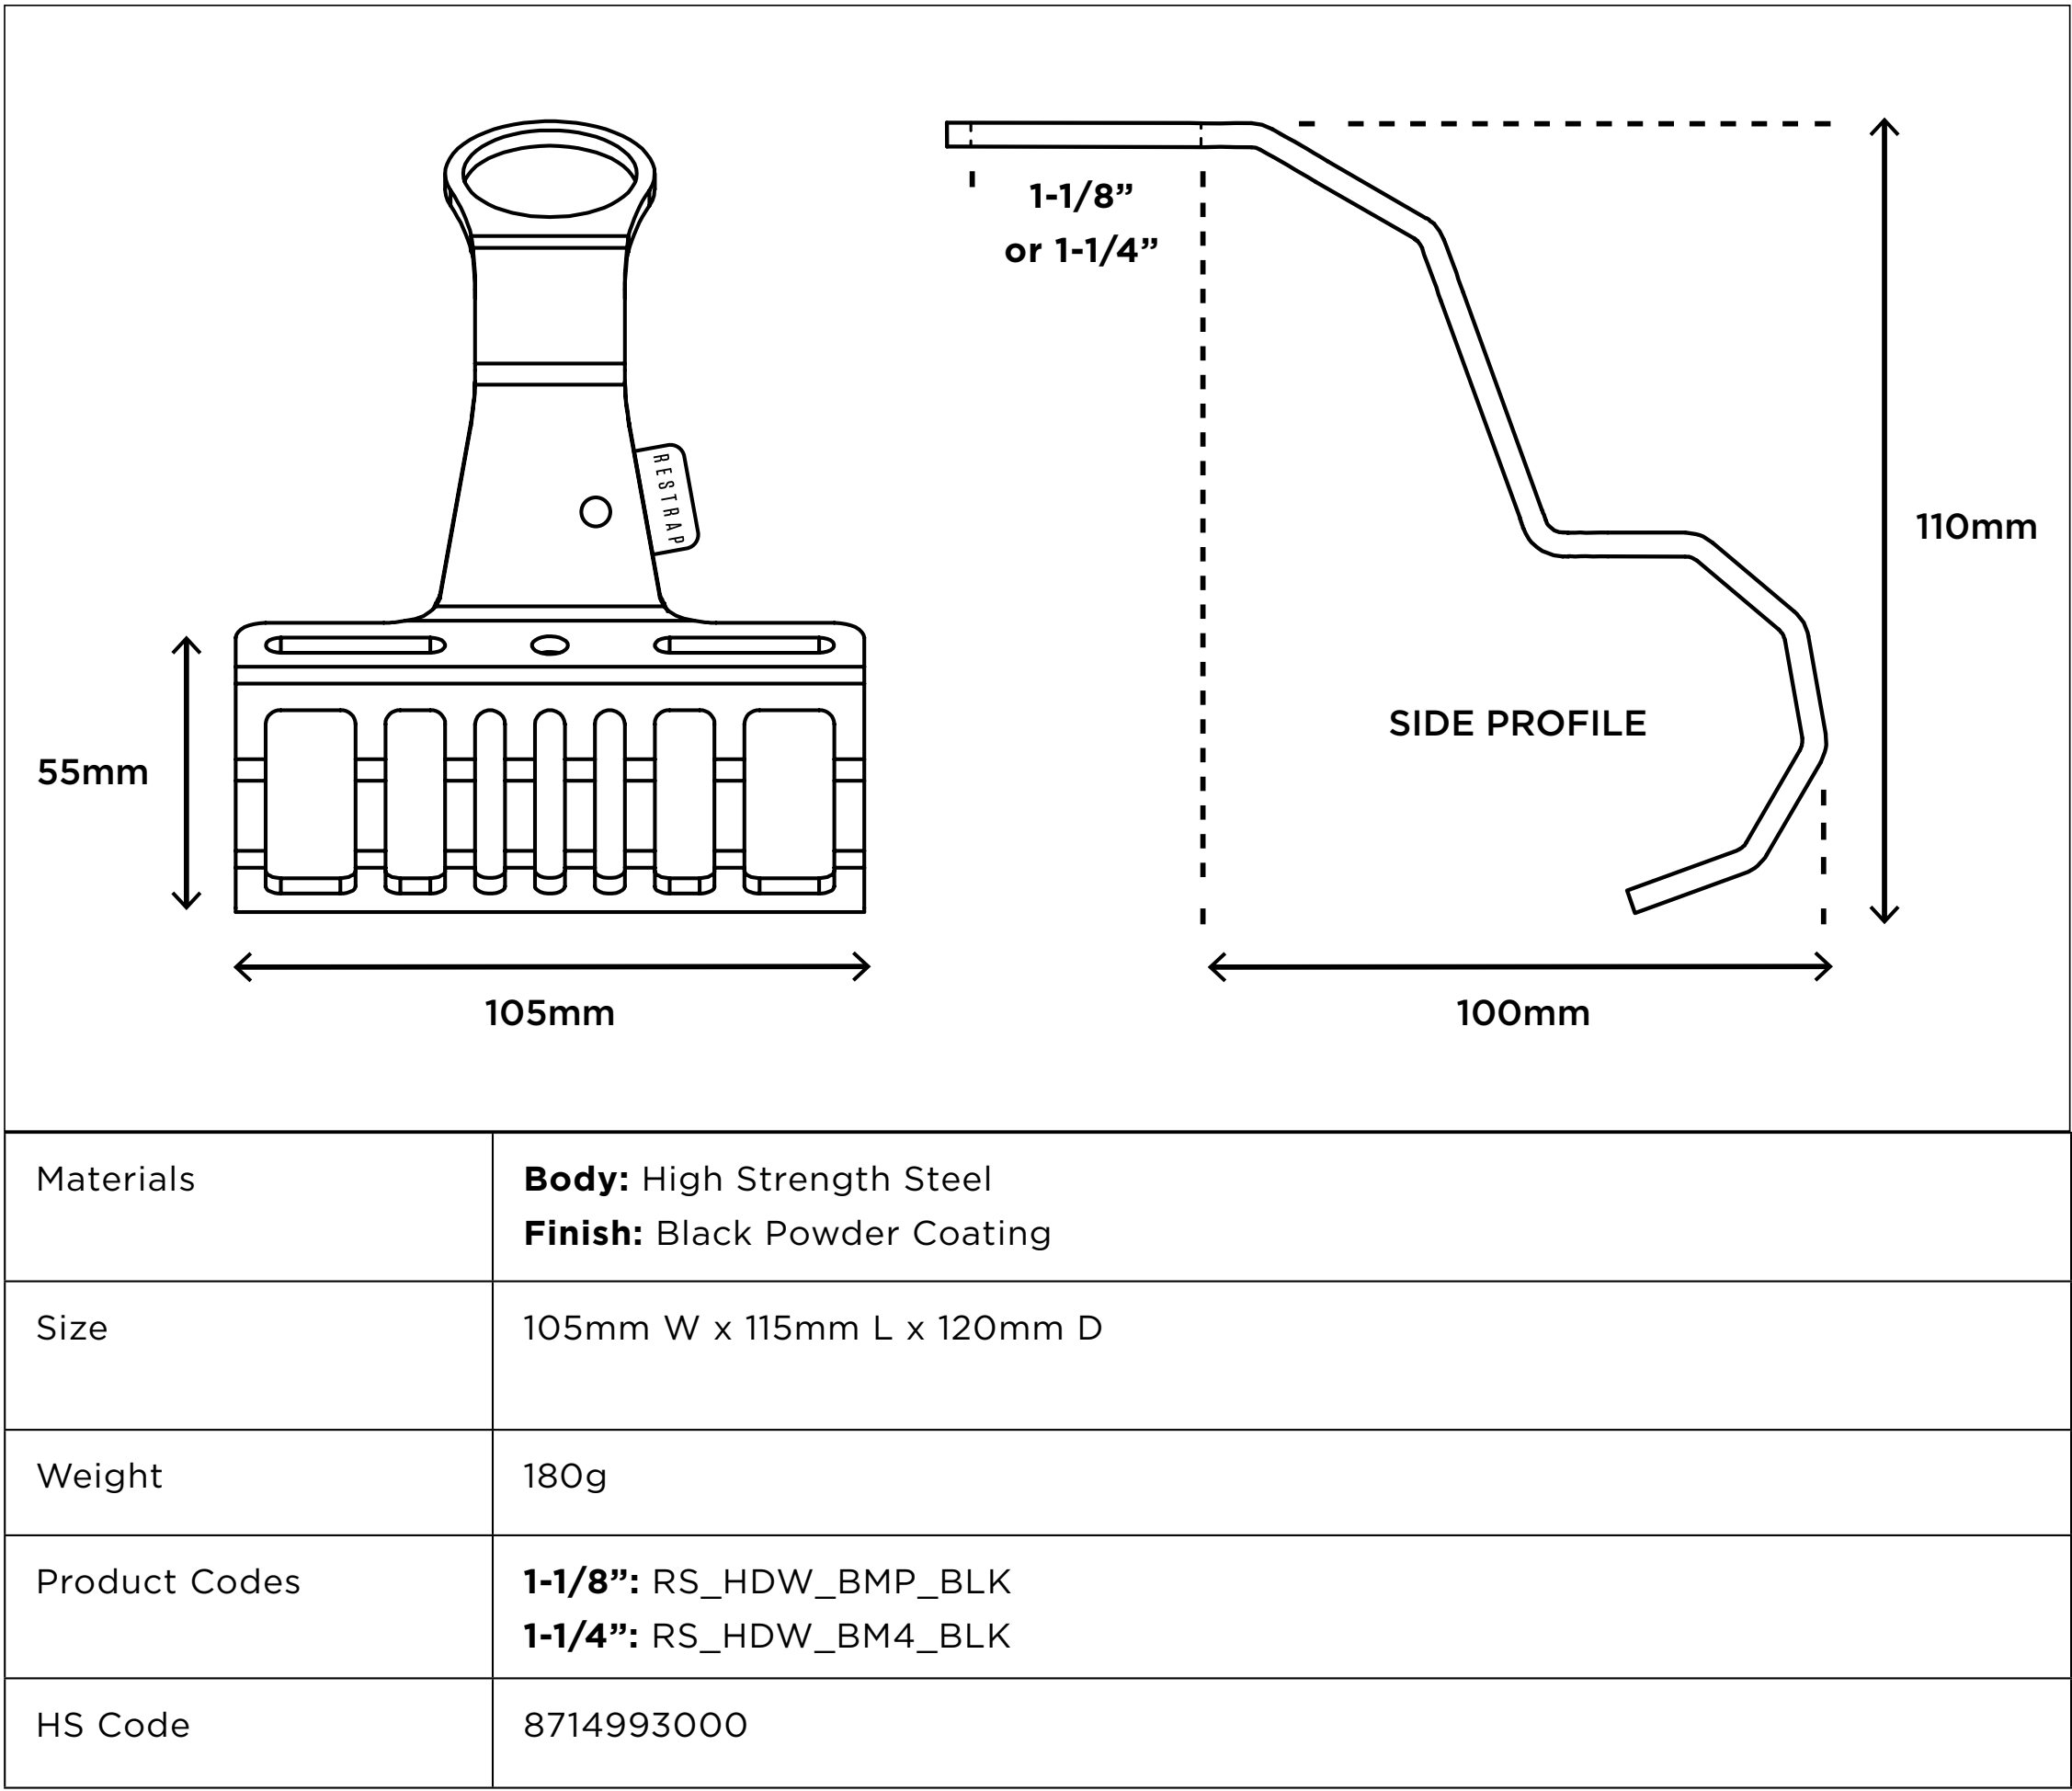

The Bumper Bar is a unique accessory that serves multiple functions; as a hard point for mounting lights, while also acting as a spacer for our range of bar bags, pushing them upwards and away from the front wheel. This is ideal for smaller bikes with a low stack height or where handlebar to tyre clearance is limited.

Made from high-strength steel with a durable powder coated finish, the Bumper Bar includes a front grille and 30mm slots on the top and bottom that work seamlessly with the retention straps of our bar bags. Also included are 5mm diameter holes on the top and bottom for additional mounting options.

The front is curved to allow the fitting of most lights, where the position out the front of the steerer is ideal for forward visibility.

The Bumper Bar acts as a 3mm headset spacer and comes in two sizes to fit 1-1/8” or 1-1/4” steerers.

TECHNICAL DETAILS

CARRY CAGE

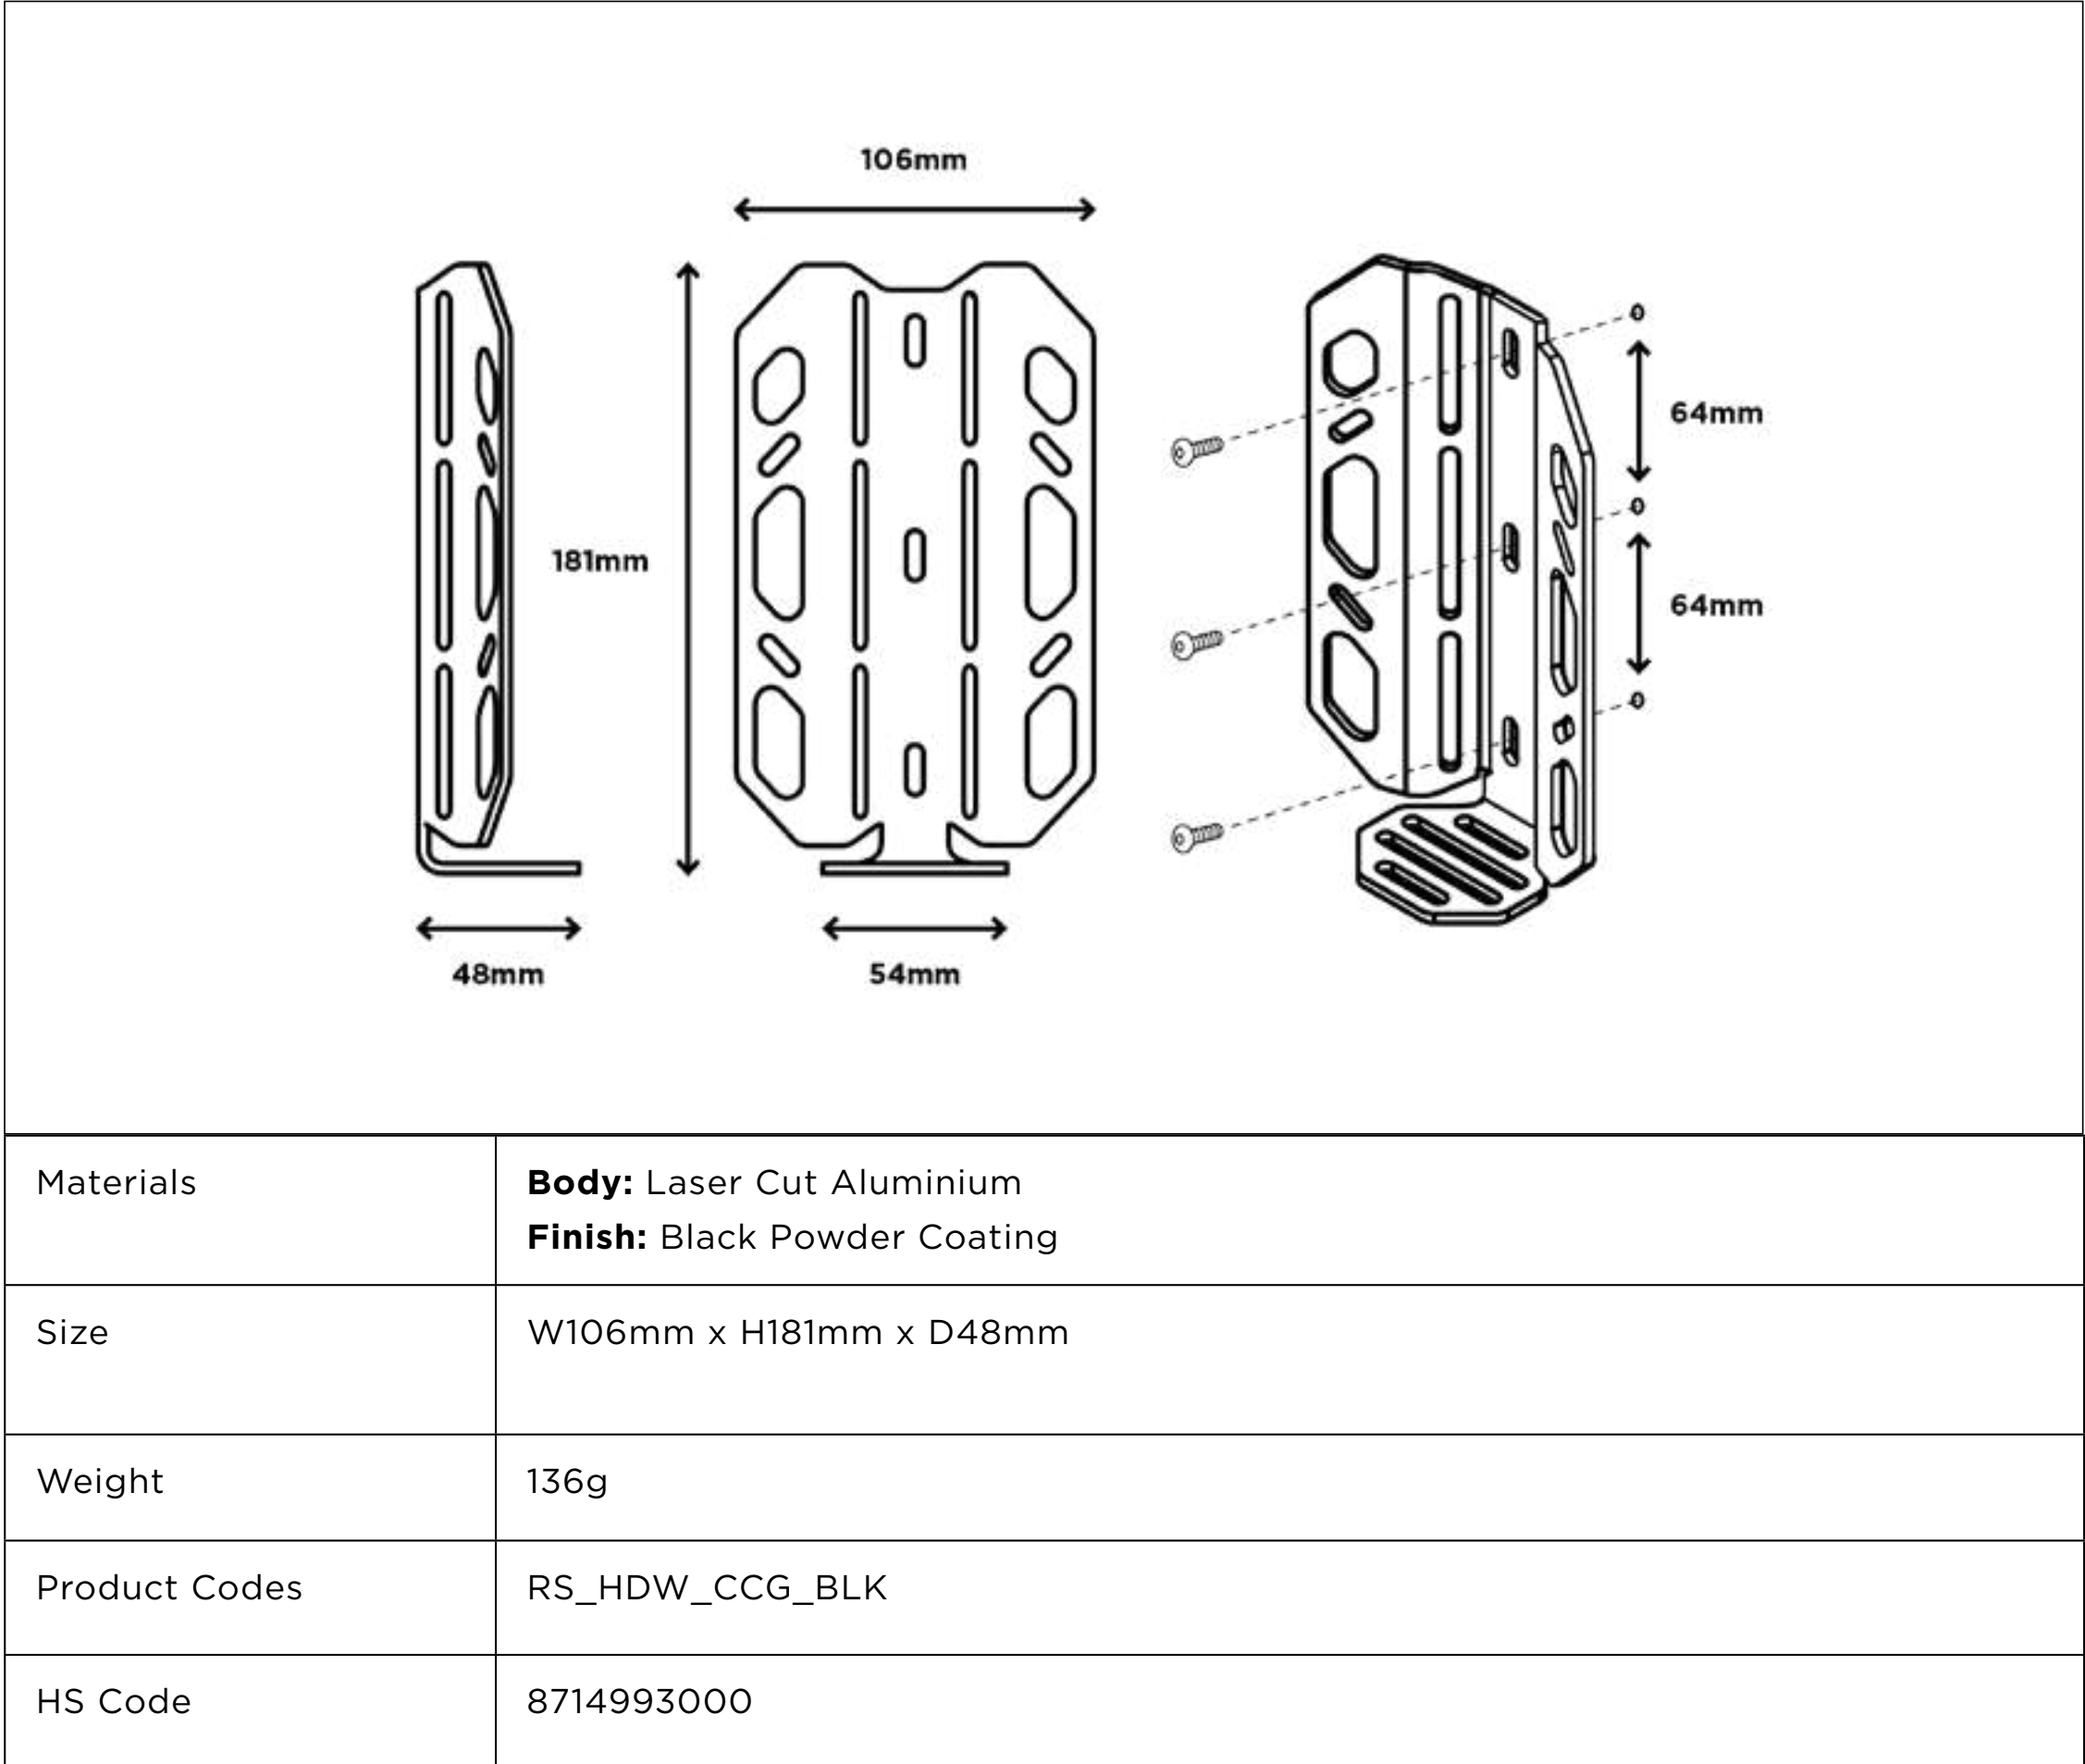

The Carry Cage is a secure and versatile carrying solution that allows you to easily expand your horizons, whether you’re bikepacking, touring or just exploring.

Working in perfect harmony with Restrap Fork Bags or Fast Straps, the Carry Cage accommodates a huge range of cargo from extra water bottles to camping equipment. Three adjustable mounting points allow the cage to be mounted in a variety of positions on the bike.

The Carry Cage is made from laser cut aluminium and finished with a black powder coating and Restrap branded rubber label. For guidance on fitting, please follow manufacturers recommendation for your frame/forks.

Weight - 136g  
Max. load: 3kg

TECHNICAL DETAILS

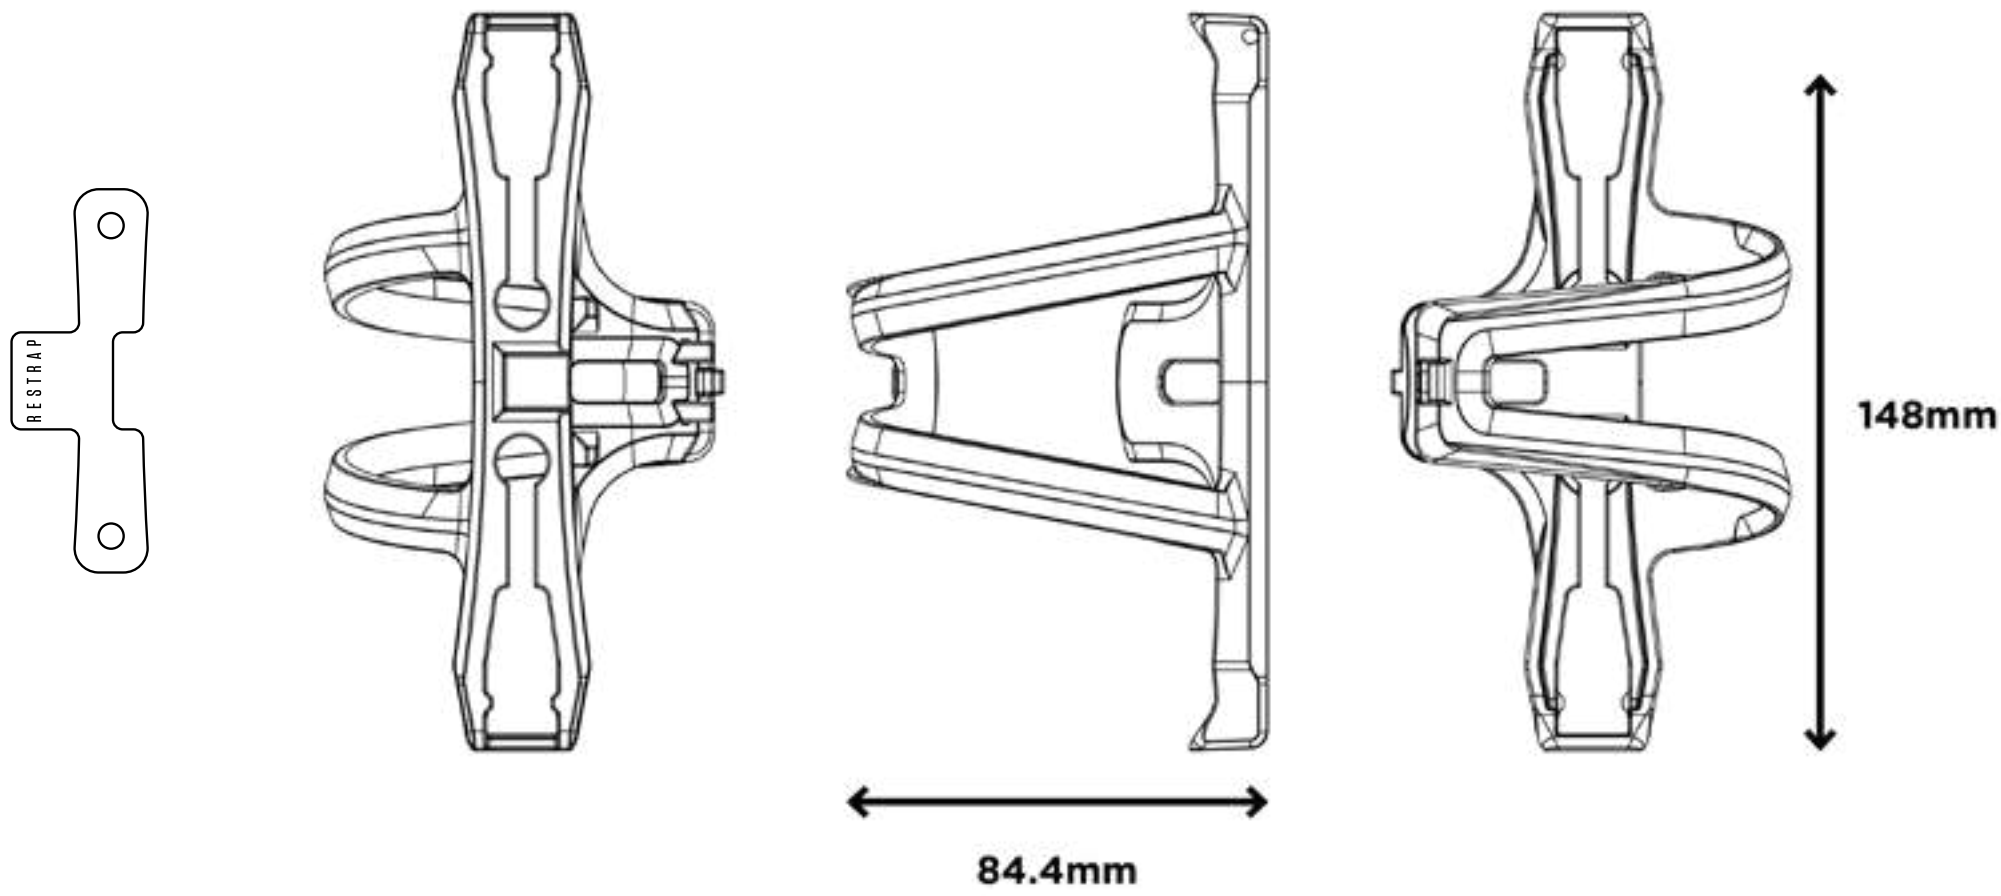

SIDE RELEASE BOTTLE CAGE

This side release bottle cage allows convenient access to your water bottle by featuring a side entry. This makes it ideal for bikes with compact frames, or for when using a frame bag may affect clearances on bottles.

With a foldable base, it offers the flexibility of being mountable in two different orientations, giving you the choice to have the opening on either the left or the right side. A Grip Strip is included to ensure secure mounting and frame protection, with 25mm of adjustment for the perfect fit. The cage also has a rubber retention loop which keeps bottles even more secure on rough and bumpy terrain.

Adjustable fit means this cage can fit on any bike, using any bottle mounts available on the frame or forks.

TECHNICAL DETAILS

Materials	<b>Cage:</b> Nylon <b>Grip Strip:</b> Silicone <b>Bolts:</b> Steel
Size	<b>Cage</b> - W84.4mm x L148mm
Weight	51g
Product Codes	<b>Cage</b> - RS_SDR_BTC_BLK
HS Code	8714999089

LIGHT MOUNT

The Restrap Light Mount is a useful accessory that allows lights to be mounted to any M5 threaded eyelets, keeping your handlebars clear for mounting bags or other accessories.

By attaching lights to different spots like mid-fork, dropouts, or rack eyelets at the back of the frame, this keeps lights out of the way of luggage that could obstruct the beam. As a secondary function, it also serves as a tool to thread/unthread the crank bolt found on Shimano cranks.

20mm M5 Bolt included.      Weight: 15g

TECHNICAL DETAILS

Materials	<b>Mount:</b> Plastic <b>Bolt:</b> Coated Stainless Steel
Size	28mm Diameter 40mm length
Weight	15g

# ACCESSORIES

BIKEPACKING SOLUTIONS

## ACCESSORIES

Our Accessories range is packed with innovative solutions to your needs on the road. If something irks you while bikepacking, rest assured we've probably already thought of it and have a solution for you.

DOWNTUBE BAG

The Restrap Downtube Bag is designed to boost carrying capacity by utilising the otherwise dead space beneath the downtube. Particularly useful for smaller frames, or anyone who requires extra capacity. The Downtube Bag adds 1.2L of fully waterproof stowage, attached simply via velcro; no need for specific bosses.

The Downtube Bag has a fully waterproof construction, with a roll top closure to keep the elements, road spray or trail debris where they should be. A single, integrated, velcro strap wraps around the Downtube Bag and downtube, securing it tightly in place and minimising rattles. A stitched in grip pad prevents the bag from sliding out of position. The bolt-free attachment means the Downtube Bag can be swapped from bike-to-bike in seconds.

While you can store what you like in the Downtube Bag, we believe that it is most useful for spares, tools and heavier items. By storing them in a low and central location, you help maintain the bike's natural centre of gravity. This is also useful if you run a dropper seat post on your bike and are unable to store items under your saddle; or if your bikepacking set up means that you aren't able to run a tool pouch in its usual location.

The Downtube Bag is designed to fit all bikes, from the skinniest of steel tubing up to 19 cm diameter downtubes. And while there's no prizes for guessing where it was designed to fit, there's nothing stopping you from getting creative with where you choose to fit the bag; cargo cages, seatpost or elsewhere.

HIKE A BIKE HARNESS

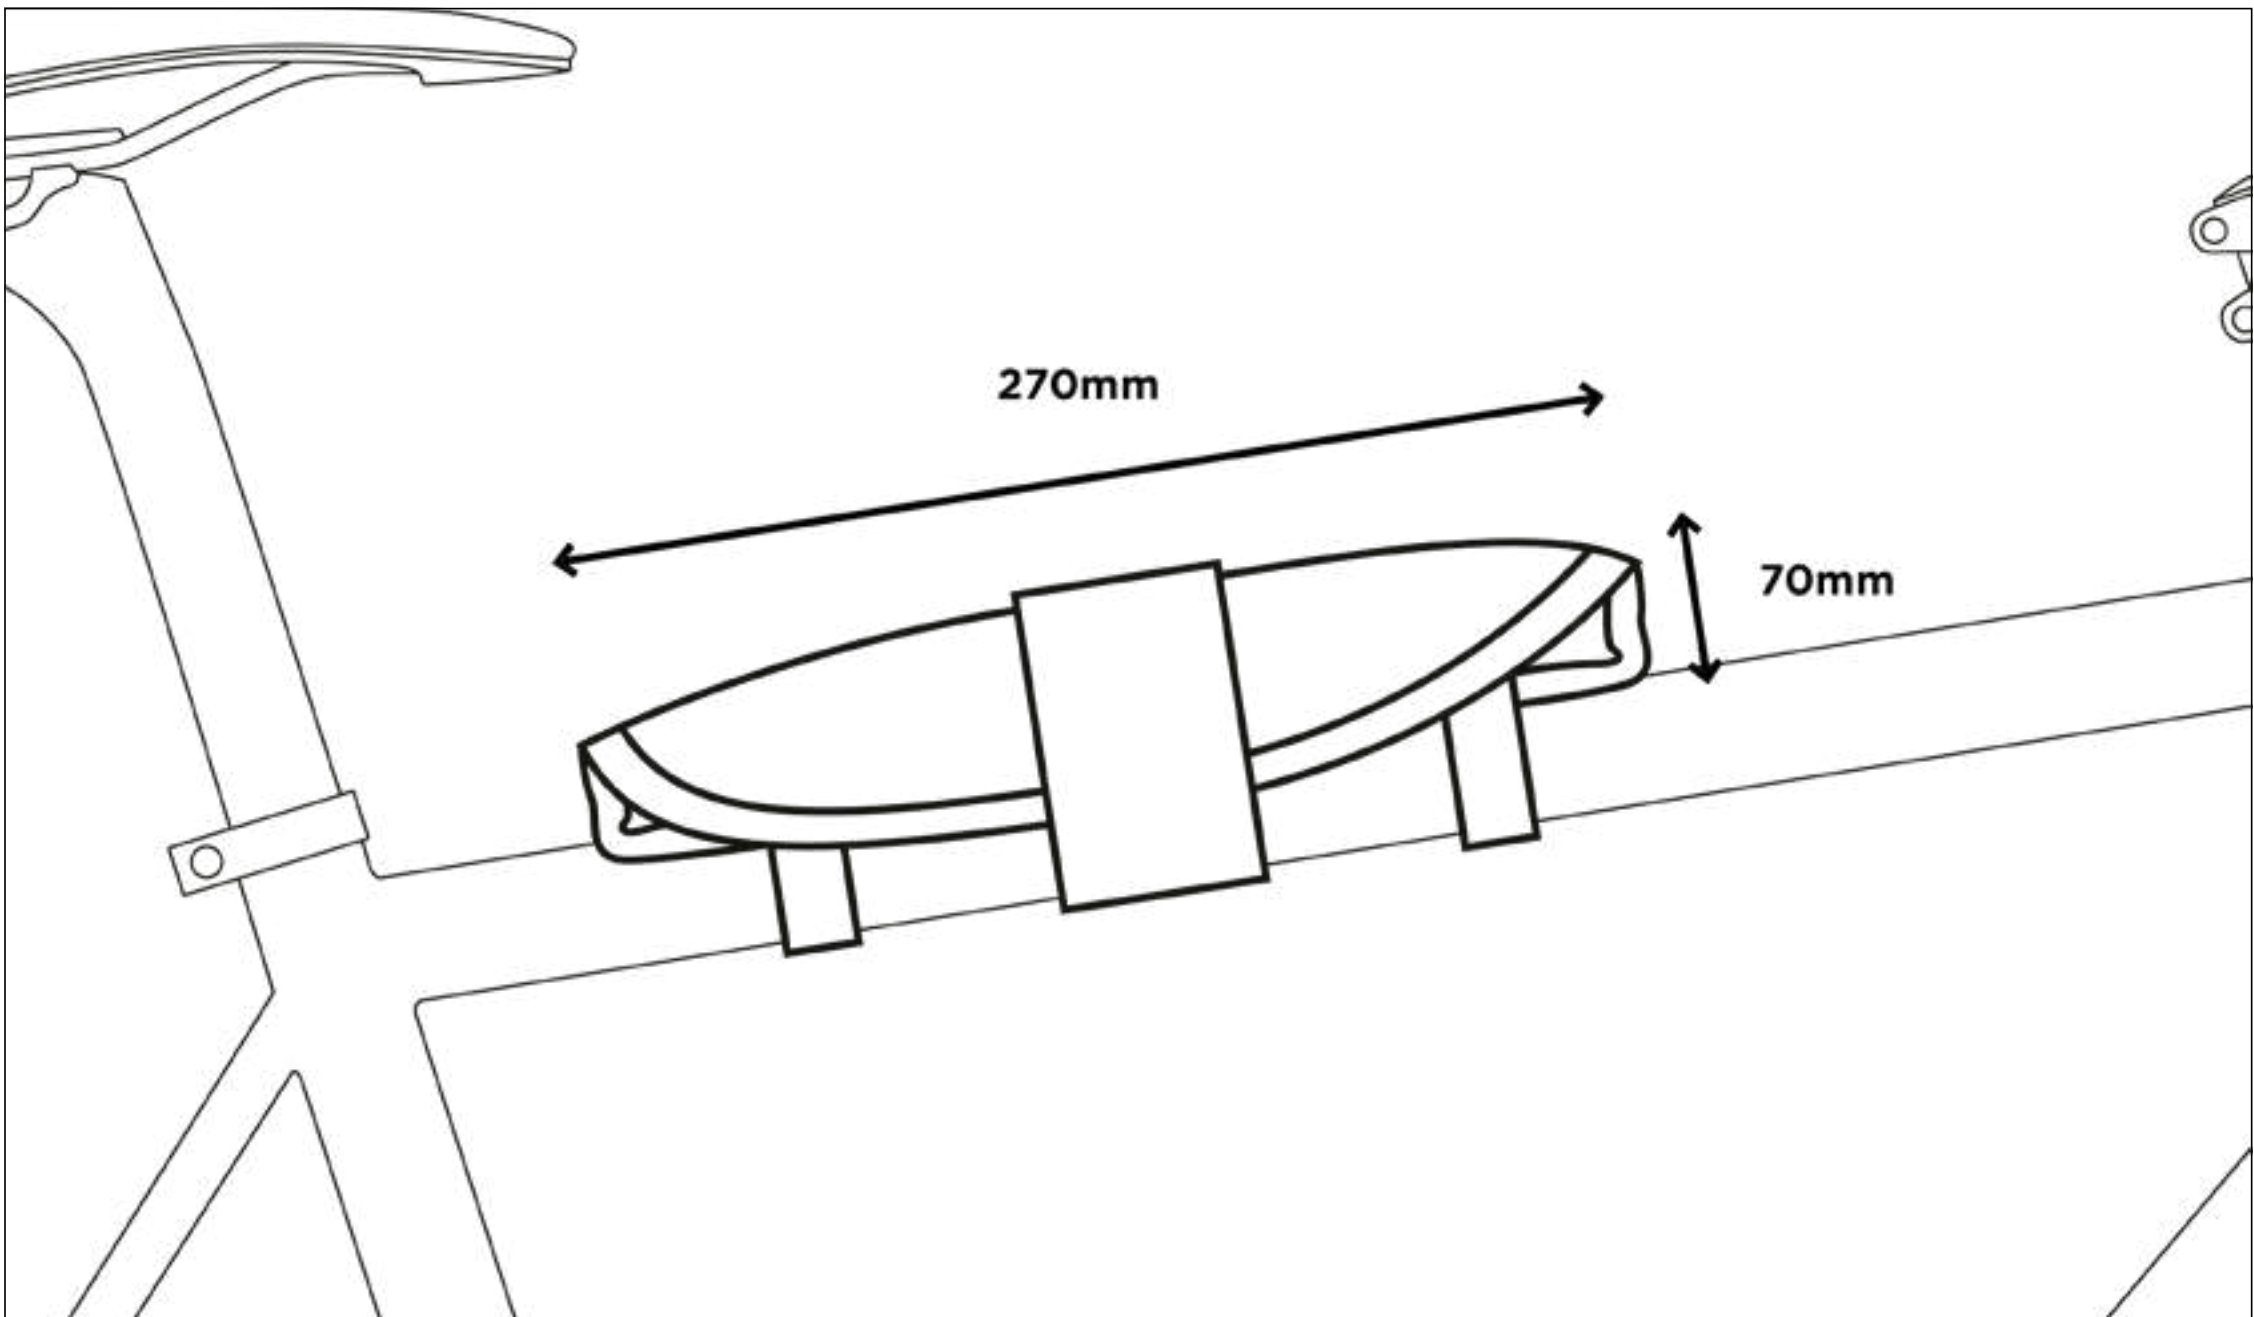

Whether you're tackling steep mountain trails or rugged terrain off road, this harness is designed to make your journey easier and more enjoyable.

The Hike-a-bike Harness is quick and easy to fit to most bikes, allowing you to go from carrying your bike to riding in a matter of seconds. When it's time to walk your bike up tough hike-a-bike terrain, the harness lets you do so hands-free whilst staying well-balanced.

Designed to not interfere with your riding, the adjustable mounting points and lightweight design allows you to tailor the harness to fit your bike. Included are two retention straps and a long fast strap to secure the front wheel in place.

Made from robust TPU coated Nylon, finished with vegan friendly PU Restrap Label.

COFFEE DRIPPER

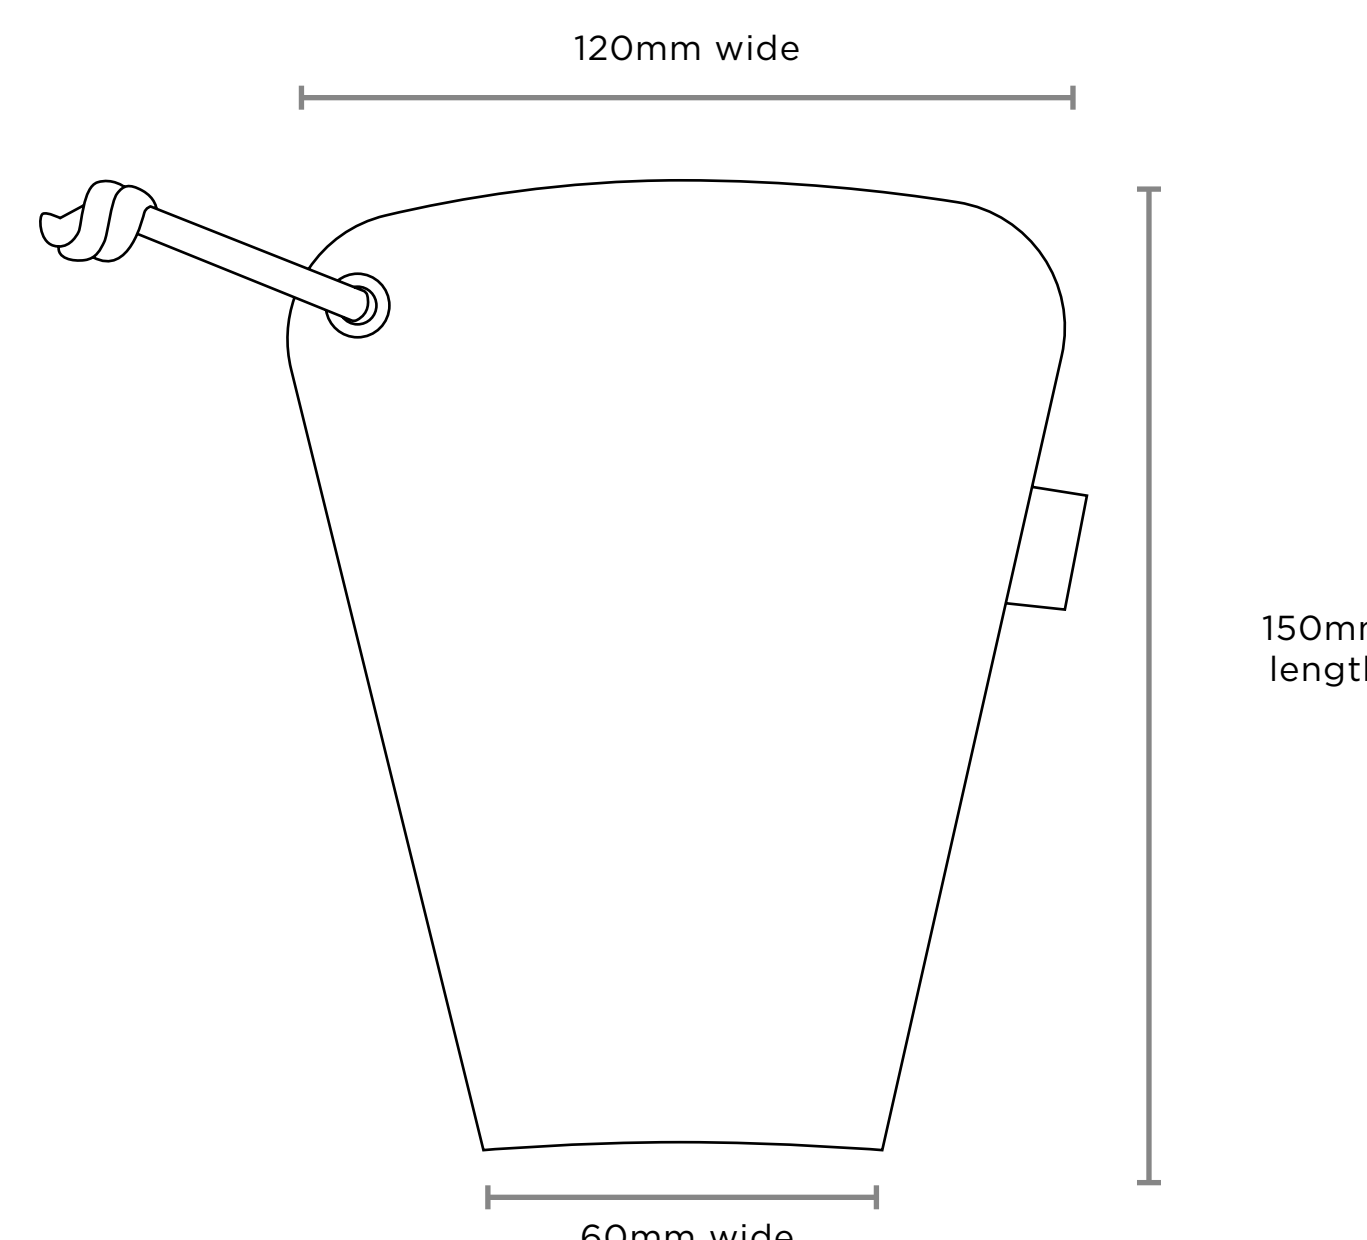

Our portable coffee dripper is the perfect solution for those who love to brew up a coffee on the road.

Three shaped pieces lock together to allow a V60 filter to sit above your mug, using a specially designed shape that always sits centrally and securely while your favourite brew drips through. It then easily packs away and fits into the supplied Textured Nylon pouch, allowing you to comfortably fit this dripper into your bikepacking bags.

\*V60 Size 02 coffee filters not included

TYRE BOOT KIT

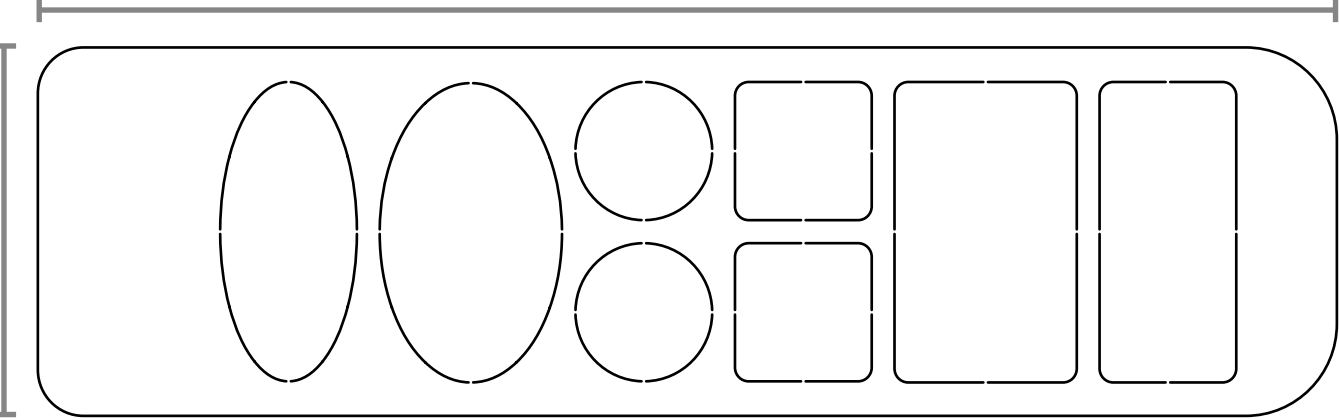

The Tyre Boot Kit is a cyclist’s must-have if it all goes wrong. The kit features 8 varied cuts of thin, durable and tear-resistant rubberised material, specifically designed to patch rips and tears on any tubed tyre. Think of it as tyre insurance.

A tube of glue is included to help mend the trickiest of rips or tears in your tyre’s surface. Supplied as a minimal pack-friendly design to fit in the smallest of spaces on your bike.

- Instructions:
- 1) Locate the affected area on your tyre
  - 2) Make sure the area where you wish to apply the patch is as clean as possible
  - 3) Apply glue to the patch
  - 4) Place patch over the affected area, ensuring full coverage
  - 5) Insert tube and re-inflate tyre
  - 6) Breathe a sigh of relief and continue on your journey\*

\*The Tyre Boot Kit is designed to save your bacon but it isn’t a permanent fix. A torn tyre should be replaced as soon as possible.

Restrap Branded Bottles with contour design, available in both 500ml and 750ml sizes.

The distinctive orange lockable spout adds a pop of colour while ensuring easy access to your favourite beverages. Leak proof construction ensures that your hydration stays where it belongs - in your bottle, not on your gear.

Easy-to-squeeze plastic makes quenching your thirst a breeze, ensuring you stay focused on your ride. The aerodynamic, ergonomic cap enhances the bottle's overall sleekness but also provides a comfortable grip during your rides. A wide opening makes this bottle easy to clean, refill and add electrolyte tablets and powders.

Our Restrap Bottles are proudly made from 100% recyclable, BPA/F/S and PET(E) Free polyethylene.

200Z ENAMEL MUG

Bike packing and camping are tough activities. Here at Restrap we provide equally tough products that can be carried and used every day without failing.

Our extra large enamel mugs provide a highly durable, easy-clean solution for eating and drinking in the wild as well as a great way to boil water and heat up food. The 80mm diameter base sits comfortably on most stoves and the 90mm internal width is large enough to fit smaller gas-canisters which can be easily secured with a Restrap Fast Strap.

This is a stylish and ideal gift for those who love the outdoors.

Size: 20oz / 568ml (That's right, a pint!)
